Part 1: Plan

Write your answer below.

Write a plan for the essay prompt below. Please note – this question asks for a plan, not a full essay. You will write the essay in the next question.

Describe different types of technology that families can use to talk to each other.

Include information about:

- the different types of technology that you have used.
- the benefits families might have as a result of using technology to communicate.
- what technology you recommend that families use to stay in touch, and why.

Part 2: Essay

Write your answer below. Use full sentences.

Describe different types of technology that families can use to talk to each other.

Include information about:

- the different types of technology that you have used.
- the benefits families might have as a result of using technology to communicate.
- what technology you recommend that families use to stay in touch, and why.

Write at least 120 words in paragraphs.

Handwriting practice area with multiple sets of dotted lines for writing.

Part 3: Inference Question

Text

Ali and his Grandmother

Ali shifted anxiously in his chair as the man coughed impatiently. He was obviously expecting an answer soon. Ali had planned to show his usual confident personality, but now, unfortunately, he felt his throat dry up. When he was younger, Ali had considered a career in medicine, but as he grew, he realised that technology was his passion. Since he started at the virtual reality company, he had dreamed of advancing to this post. As he tried desperately to think, the distant ringing of a phone distracted him. Ali's eyes suddenly needed wiping, and he swallowed hard. By the time the ringing stopped, Ali's fond memories of his grandmother had transported him into the past.

"When I got my first smartphone," he remembered grandmother saying, "I realised that technology had been developed to a great extent over the years. The fact that I can see who I'm talking to is magnificent. It has a great selection of tunes that I can choose from, and more games than my old antique phone ever had." Even now, his grandmother enjoyed being introduced to modern devices, although she still thought technology was just a hobby for her grandson.

The question still needed answering, but Ali just couldn't form a response. The chance to lead exciting new projects was in his grasp, providing he could demonstrate his full potential. He was ambitious like his grandmother, whose advice he usually listened to, and badly wanted to impress her with his achievements. His career choice, when he announced it, had originally been met with disappointment by his grandmother. Until then, she had always assumed he would become a doctor, the profession she had the highest regard for. She always liked being taken care of when she visited the hospital for her check-ups. The doctors had agreed that she would live many more years, providing that she continued to exercise regularly. Yet, Ali decided, *it is the modern equipment which doctors rely on, that has really improved healthcare. Education and entertainment too - technology is everywhere!* Ali suddenly grew excited as he thought of all the ways society had been changed by technology, and he was part of this advancement.

"Thank you, Gran," Ali whispered, "I needed inspiring." Ali engaged the man with his familiar, confident smile and cleared his throat.
