مدرسة المعرفة (2) الحلقة الثانية والثالثة بنات

**Part One: Opinion**

**Write your answer below. Use full sentences**

**"In your opinion, has technology changed cultural festivals and customs in your country?  
Why?"**

**Write at least two sentences.**

Almanahj.com | 2025 2024

## Part Two: Plan

**Write a plan for the essay prompt below. Please note – this asks for a plan, not a full essay.**

**Write a plan for an essay about how technology has changed cultural festival or custom in your country.**

Include information about:

- Briefly introduce the festival or tradition you will discuss.
- Mention why this cultural event is important and how it has changed over time.
- Explain how technology has influenced the festival or tradition.

### Part Three: Essay

**"How has technology changed traditional cultural festivals and customs in your country?"**

Include information about:

- Briefly introduce the festival or tradition you will discuss.
- Mention why this cultural event is important and how it has changed over time.
- Explain how technology has influenced the festival or tradition.

**Write at least 150 words in paragraphs.**

The image shows a large, empty rectangular box intended for writing the essay. Overlaid on this box is a large, semi-transparent watermark. The watermark consists of the text 'Almanahj.com' in a large, light grey font, with '2025' on the left and '2024' on the right. Below the text is a stylized icon of a smartphone with a white screen and a red home button. At the bottom of the watermark, the Arabic text 'موقع المناهج الإماراتية' is written in a light grey font.

#### Part 4: Inference Question

#### Text

#### The Smart City Project

Ali and his family live in Dubai, one of the most modern cities in the UAE. One day, Ali's father told him about a new "smart city" project in their neighborhood. Ali learned that this meant the city was adding new technology to make life easier. For example, they were putting sensors on streetlights to help with traffic and installing solar panels on buildings to save energy. Ali was excited and wanted to see how this new technology worked.

The next day at school, Ali's teacher showed the class how to use tablets for studying. Before, they used heavy textbooks, but now they could find information on their screens with just a tap. Ali liked this change because it made learning easier and faster. After school, Ali told his parents that he felt lucky to be learning with the latest technology. His father agreed, saying, "In a few years, you'll be even more prepared for the future!"

One weekend, Ali's family went to a science fair in the city. They saw a robot that could help people by carrying bags and delivering items. There was also a drone that could fly and bring packages to homes. Ali was amazed and asked his father, "Do you think one day we will live in a city full of robots?" His father laughed and said, "Maybe! The UAE is growing quickly with technology. Who knows what will happen next?" Ali went home feeling excited and curious about the future of his smart city.

Write your answer below. Use full sentences.

What can we guess about Ali's view of the future after the science fair?

**Part 4: Justification Question**

**Write your answer below. Use full sentences.**

**Why is your answer to the inference question the best answer?  
Use the information in the text above to support your answer.**

## Part One – Maze

Life in the past in the UAE (1) **is / was / had** simple and deeply connected to the land and sea. Before the oil was discovered, most people (2) **living / lived / had lived** in small coastal villages or desert settlements. The main jobs were fishing, pearl diving, and trading, which (3) **is / was / were** essential to the economy. Pearl divers (4) **faced / facing / face** difficult conditions, spending long hours in the sea, while traders journeyed across the desert in camel caravans, connecting the UAE to other regions.

## Part 2 – Maze

In today's fast-paced world, the search for fulfilling jobs and successful careers has become increasingly competitive. Job seekers are constantly seeking opportunities to gain an edge in the market, (1) **and / for / by** improving their skills and networking abilities.

It's often said that (2) **the harder / the more hard / the hardest** you work, (3) **the much/ the more / the most** experience you gain. This rings true for individuals (4) **whose / which who** strive for advancement in their careers. The (5) **most / more / more and more** skills they acquire, (6) **the many / the more / the most** opportunities they attract.

Recently, there has been a rise in interest in remote work options. Many companies (7) **predicted / predicts / predict** that remote work (8) **will be / is being / would be** more widely adopted in the near future.

## Reading Passage:

### The Impact of Technology on Society

Technology has changed many parts of our lives in recent years. Machines and devices, like computers and phones, have made work, shopping, and healthcare easier. Artificial Intelligence (AI) is one of the most important new technologies. It helps businesses learn more about what people want to buy. AI also helps companies make better choices by studying a lot of information. Another important technology is robotics, which is used to make products. Robots can work with great care and do things faster than people. In healthcare, new technology is also making life better. For example, new types of prosthetics (artificial body parts) help people do everyday activities more easily.

Technology makes life easier in many ways, but it also brings some problems. For example, some people worry about their privacy with new devices. It is important to think about these issues as we use more technology.

#### Multiple-Choice Questions:

**1. One way AI is useful for businesses is by:**

- A) creating more online shopping websites.
- B) helping them understand what customers want.
- C) replacing robots in the factory.

**2. Robots are helpful in factories because they:**

- A) help businesses learn about their customers.
- B) study lots of information like AI.
- C) are faster and more careful than humans.

**3. Which of the following is a benefit of new prosthetics in healthcare?**

- A) They let people shop online.
- B) They help people with daily tasks.
- C) They are only used in factories.

**4. What is one concern people have about new technology?**

- A) It is too slow for making products.
- B) It takes away people's jobs.
- C) It can affect people's privacy.

**5. What is the general message of this passage?**

- A) Technology is always helpful and easy to use.
- B) Technology has benefits but also some problems.
- C) Only healthcare benefits from new technology.

## Falconry: An Ancient Sport

Falconry is the practice of training and using birds of prey, such as falcons and hawks, to hunt small animals. This sport is very old; people have practiced falconry for over 4,000 years! It is thought to have started in the Middle East and Central Asia and then spread to Europe, North Africa, and even Japan.

In falconry, a trained bird wears a small leather hood over its head to keep it calm. The falconer, the person who trains the bird, uses a glove to protect their hand and a special rope called a "leash" to control the bird. When the bird is ready to hunt, the falconer removes the hood. The bird flies into the sky and searches for small animals, like rabbits or mice. When the bird catches an animal, it brings it back to the falconer.

Falconry requires a lot of patience and skill. It can take years to train a bird properly, and the falconer must develop a close bond with the bird. Many people who practice falconry say it is not just a sport but also a way of life.

### Comprehension Questions

- 1. Where did falconry most likely begin?**
  - A. Japan
  - B. The Middle East
  - C. Europe
- 2. Why do some people consider falconry more than just a sport?**
  - A. It takes only a short time to learn
  - B. It is a way of life that requires a bond with the bird
  - C. It helps them earn a lot of money

## Reading

1. Some people think smartphones are a new technology, but they are not. Smartphones have been around over 24 years, since 1992. As more and more apps come out for phones, they are used in more areas of life.
2. One of the major new developments are apps that can deal with you money. There are apps on which you can do online banking, apps for you to send money to other people and apps for contactless payment.
3. The first contactless payment system was in gas station in 1997. 10 years later, banks in the UK gave out the first contactless credit cards. Because there are some worries about how safe it is, it was only used for small payments at first. However, the amount of people can spend on them has since increased.
4. One major advantage of using a smartphone to pay for things is that you can checkout quicker. Research shows that for most people, the least favorite part of shopping is waiting to pay for their items. When shops started using contactless payment, they saw a 30% increase in sales. People were spending more money, and this was good for business.
5. Online banking is another new way we can use smartphones to make our finances more convenient. One advantage is that a person can send money quickly and easily from their own bank account into another bank account using there smart phone. Unlike banks, online banking doesn't close in the afternoon and you can use it anywhere. This is very useful, especially if any of your family members are abroad and need money quickly.
6. There are worries about how safe online banking and contactless payment is. However, remember most companies have safety features in their apps. If you are worried, here are three suggestions. Firstly, make sure you always have a lock on your phone. Secondly, never share bank details with anyone you don't know and, thirdly, try not to make your numbers really simple or something like your birthday date.

**Read the article and choose the correct heading for each paragraph.**

Write the letter of the correct heading on each line. The first one is done for you. You must use each heading only once. There is one heading you do not need.

**Example:** Paragraph 1: E Smartphones are not new

Paragraph		Answers
1. Paragraph 2	B. The first contactless systems.	
2. Paragraph 3	C. benefits of contactless.	
3. Paragraph 4	D. Different money apps	
4. Paragraph 5	E. Advice on keeping your money safe.	
5. Paragraph 6	F. How many people use contactless.	
	G. Why online banking is sometimes better.	

Read the article again and complete the notes below *with words from the text*. Use no more than **2 words**. The first one has been done for you.

Smart phones

- Invented in (Example): **1992**.

Apps for:

- contactless
- sending money
- 6. \_\_\_\_\_ banking

Contactless payment

- 1997: First systems in 7. \_\_\_\_\_
- Business benefits: 8. \_\_\_\_\_ in sales

Online banking

- Can use it from 9. \_\_\_\_\_

Staying safe

- Lock your phone, never give bank 10. \_\_\_\_\_,
- Finally, never choose easy 11. \_\_\_\_\_ like the date when you were born.
