Part 1: Writing Task – Opinion Question

Provide your opinion on the topic below. Write at least two sentences supporting your viewpoint.

"*Do you think technology has made communication between people easier or more difficult? Why?*"

Part 2: Writing Task – Plan for Essay

Create a detailed plan for how you would approach writing an essay on the following topic

Topic:

"*'The impact of artificial intelligence on daily life.' Address the following points:*

- o *How AI is used in everyday life.*

- o *The benefits of AI for individuals and society.*

- o *Possible negative consequences of AI and how they can be avoided.*"

- ---

- ---

- ---

- ---

- ---

- ---

Part 3: Writing Task

Write a detailed essay in response to the following prompt. Your essay should be 170 words long.

- "Write an essay on the topic: 'The impact of artificial intelligence on daily life.' Address the following points:

  o How AI is used in everyday life.

  o The benefits of AI for individuals and society.

  o Possible negative consequences of AI and how they can be avoided."

- --

- --

- --

- --

- --

- --

- --

Part 4: Free-response Question – Inference and Justification

"Maria had always loved the bustle of the market, the noise of the vendors calling out, the smell of fresh bread, and the laughter of her friends as they shopped together. But recently, as she walked through the crowded stalls, she began to feel a sense of disconnection. The faces around her seemed unfamiliar, and her once familiar surroundings felt cold and distant. It was as if the market, which had once been a place of warmth, had turned into something unrecognizable. Her friends seemed preoccupied, and the joyful noise that once filled her with happiness now felt like an interruption in the silence she so desperately craved. What had once been a comforting experience had transformed into an exhausting, almost overwhelming challenge."

- **Question**:

  What does the author imply about Maria's feelings towards the market? --------------------
  ----

  Why do you think your answer is the best? *Provide evidence from the text to support your answer*.

Reading Tasks

Part 5: MAZE Task – Grammar and Sentence Structure

- **Part 5:**

- "In many cultures, celebrations are held to mark special (1) _____. These events can vary widely, depending on the (2) _____ of the people involved. For example, some prefer to keep it simple, while others may include elaborate customs to show (3) _____ for their traditions. The (4) _____ spent on such occasions can differ greatly based on personal choices."

- **Options for Each Gap:**

- **a) occasions**
  b) expenses
  c) capacity

- a) identity
  b) customs
  c) representative

- a) concentration
  b) respect
  c) interruption

- a) celebration
  b) expense
  c) guidance

- ───────────────────────────

- **Part 6:**

- **"Artificial intelligence (AI) is transforming the way people work and live. Many believe that AI holds immense (1) _____ for improving human lives, but others view it with (2) _____, fearing it could lead to disruptions. It is essential to strike a balance between innovation and (3) _____ use of technology. In cultural contexts, AI might affect how people interpret (4) _____ and identities, requiring (5) _____ guidance to maintain traditions and respect. Furthermore, managing interruptions caused by over-reliance on (6) _____ systems remains a challenge."**

- **Options for Each Gap:**

- a) potential
  b) capacity
  c) pessimism

- a) optimism
  b) pessimism
  c) respect

- a) practical
  b) concentration
  c) artificial

- a) celebrations
  b) customs
  c) identity

- a) appropriate
  b) expense
  c) representative

- a) electronic
  b) cultural
  c) familiar

Sample Text (Part 7):

The Cultural Shift in Global Celebrations

In recent decades, global celebrations have undergone significant transformations due to cultural exchange and technological advancements. For instance, festivals like Diwali, celebrated primarily in India, have found enthusiastic audiences in countries such as the United States and Australia. Social media platforms have played a pivotal role in spreading awareness about these events, making them more inclusive and accessible. Similarly, Western traditions, such as Halloween, are now enjoyed in parts of Asia and Africa, reflecting a blending of cultures.

However, this cultural shift raises questions about the authenticity of these celebrations. Critics argue that while global exposure promotes understanding, it might dilute the traditions' original significance. For example, traditional dances or rituals might be altered to appeal to broader audiences, leading to a loss of their deeper cultural meaning.

Another key factor driving the evolution of celebrations is the rise of artificial intelligence (AI). Virtual reality experiences are now enabling people to participate in festivals without leaving their homes. While this innovation fosters convenience, it also reduces the social interactions and shared experiences that make these events special.

Questions:

1. What has contributed significantly to the global spread of celebrations?
   a) Government regulations
   b) Social media platforms
   c) Educational institutions

2. According to the text, what is one criticism of the global blending of celebrations?
   a) It makes celebrations more inclusive.
   b) It can dilute the traditions' original meaning.
   c) It encourages excessive spending.

3. How has artificial intelligence influenced celebrations, as mentioned in the text?
   a) By encouraging in-person participation
   b) By creating virtual experiences
   c) By restricting cultural exchange

4. Which example is given to demonstrate the blending of cultures?
   a) Diwali being celebrated in the United States
   b) Social media posts about traditional food
   c) Halloween being banned in parts of Asia

5. What is the author's perspective on the changes in global celebrations?
   a) They are entirely positive.
   b) They raise both opportunities and concerns.
   c) They should be resisted to preserve traditions.

Text (Part 8):

The Role of Optimism in Problem Solving

Optimism is often described as the ability to see the brighter side of any situation. This trait plays a crucial role in problem-solving, especially in challenging circumstances. Research shows that individuals who adopt an optimistic mindset are more likely to persist when faced with difficulties.

Take, for instance, the story of a young engineer who developed a groundbreaking renewable energy solution. Initially, her prototypes failed multiple times, and she faced criticism from peers. However, her unwavering optimism enabled her to learn from these setbacks rather than giving up. Eventually, her invention gained international recognition, benefiting countless communities worldwide.

At the same time, it is important to distinguish optimism from unrealistic expectations. While optimism encourages persistence, it must be grounded in practicality. Experts suggest that combining optimism with careful planning leads to the best outcomes. This balance ensures that individuals remain motivated without losing sight of reality.

Questions:

1. How is optimism defined in the text?
    a) As a tendency to avoid challenges
    b) As the ability to focus on positive aspects
    c) As a refusal to acknowledge setbacks

2. What was one key factor in the engineer's success?
    a) Receiving immediate support from peers
    b) Learning from her failures
    c) Avoiding any form of criticism

3. According to the text, what is the ideal way to approach optimism?
    a) Pair it with careful planning
    b) Avoid it in challenging situations
    c) Focus on unrealistic goals

Part 9: Multiple-choice Questions

The Growing Impact of Renewable Energy Solutions

The global energy landscape is undergoing a rapid transformation. With climate change at the forefront of international discussions, renewable energy sources like solar, wind, and hydroelectric power have become critical for sustainable development. Countries such as Germany and Sweden have already achieved significant milestones in transitioning to greener energy alternatives, setting benchmarks for other nations.

Solar energy, for instance, is one of the fastest-growing renewable technologies. Recent advancements have made solar panels more efficient and affordable, enabling homeowners and businesses to adopt this technology widely. Similarly, wind farms,

particularly offshore installations, are generating massive amounts of electricity while minimizing environmental impact. However, challenges remain, including the need for better energy storage systems to address the intermittent nature of renewables.

Another significant development is the role of policy and investment. Governments are incentivizing renewable energy projects through subsidies and tax benefits, encouraging private companies to contribute to this sector. Despite these efforts, critics argue that some regions lag due to insufficient infrastructure and lack of public awareness about the benefits of clean energy.

Ultimately, renewable energy represents a critical step toward a more sustainable future. While the transition involves complex challenges, global cooperation and innovation are paving the way for a cleaner, greener planet.

Questions:

1. Which countries are mentioned as leaders in renewable energy adoption?
   a) Germany and Sweden
   b) The United States and Canada
   c) China and India

2. What is one key factor driving the widespread adoption of solar energy?
   a) Advances in storage technology
   b) Improved efficiency and affordability
   c) Government restrictions on traditional energy

3. What is a major challenge associated with renewable energy?
   a) Environmental degradation caused by wind farms
   b) Difficulty in storing energy effectively
   c) Lack of international cooperation

4. How are governments encouraging the use of renewable energy?
   a) By banning fossil fuels
   b) Through subsidies and tax benefits
   c) By mandating the use of wind farms

5. According to the text, what is one criticism of the renewable energy movement?
   a) It has no environmental benefits.
   b) Some regions lack infrastructure and awareness.
   c) It discourages private investments.

6. Which renewable energy source is highlighted for its offshore installations?
   a) Hydroelectric power
   b) Solar energy
   c) Wind energy

7. What is the overall message of the text?
   a) Renewable energy is a simple solution to climate change.
   b) Global cooperation and innovation are key to addressing energy challenges.
   c) Fossil fuels are no longer necessary for global development.

Part 10: Multiple-choice Questions

The Role of Artificial Intelligence in Education

Artificial intelligence (AI) has emerged as a powerful tool in modern education. From personalized learning systems to automated grading tools, AI is transforming traditional classrooms and redefining how students learn. One of the most notable applications of AI is its ability to tailor lessons based on individual learning styles. For example, some platforms use data analytics to identify students' strengths and weaknesses, providing customized study plans.

Another promising use of AI in education is the development of virtual tutors. These programs simulate one-on-one tutoring, offering explanations, answering questions, and providing feedback in real-time. This technology is particularly beneficial for students who require additional support outside the classroom. However, concerns exist about over-reliance on AI, with critics warning that it could diminish the importance of human interaction in education.

Moreover, AI is also helping teachers by automating routine tasks, such as grading and attendance tracking. This allows educators to focus more on teaching and less on administrative work. Despite these advantages, there are challenges, including ethical concerns about data privacy and the accessibility of AI tools in underprivileged communities.

Questions:

1. What is one significant benefit of AI in education?
   a) It eliminates the need for teachers.
   b) It personalizes learning based on individual needs.
   c) It reduces the cost of education for all students.

2. What is one concern mentioned about AI in education?
   a) It may lead to increased administrative tasks for teachers.
   b) It could reduce human interaction in learning.
   c) It fails to address students' weaknesses.

3. According to the text, how does AI assist teachers?
   a) By replacing traditional teaching methods
   b) By automating routine tasks like grading
   c) By creating new lesson plans for every class

Model Answers

Part 1: Writing Task – Opinion Question

Do you think technology has made communication between people easier or more difficult? Why?

Technology has made communication easier by enabling instant messaging, video calls, and social media, allowing people to stay connected regardless of distance. However, it can sometimes lead to misunderstandings due to the lack of nonverbal cues.

Part 2: Writing Task – Plan for Essay

Topic: The impact of artificial intelligence on daily life

1. **Introduction**

   o Define AI and its growing presence in daily life.

   o Briefly mention the points to be discussed.

2. **Body Paragraph 1: How AI is used in everyday life**

   o Virtual assistants like Siri or Alexa.

   o Personalized recommendations (Netflix, Spotify, etc.).

   o Automation in household appliances (robotic vacuums).

3. **Body Paragraph 2: Benefits of AI for individuals and society**

   o Enhanced convenience and efficiency.

   o Improved healthcare through diagnostics and personalized medicine.

   o Contributions to education with adaptive learning platforms.

4. **Body Paragraph 3: Possible negative consequences of AI and solutions**

   o Job displacement due to automation.

   o Privacy concerns with data usage.

   o Mitigation: Ethical AI policies, data regulation, and workforce reskilling programs.

5. **Conclusion**

   o Summarize AI's transformative potential while emphasizing responsible use.

Part 3: Writing Task – Essay

The Impact of Artificial Intelligence on Daily Life

Artificial intelligence (AI) is revolutionizing daily life, from the way we communicate to how we work and learn. In homes, AI-powered virtual assistants like Alexa simplify tasks by answering questions or controlling smart devices. Personalized recommendations on platforms like Netflix or Spotify enhance entertainment experiences, while AI-driven tools automate household chores, making life more convenient.

AI offers numerous benefits, including improved efficiency and accessibility. In healthcare, it aids in early disease detection and personalized treatment, saving lives. AI-driven educational tools tailor learning to individual needs, fostering better understanding and academic success. On a societal level, it boosts productivity by automating repetitive tasks, enabling people to focus on creative and strategic endeavors.

However, AI presents challenges such as job displacement and privacy concerns. Ethical AI development and robust regulations can help address these issues. Reskilling programs for affected workers also ensure smoother transitions.

In conclusion, AI is a powerful force shaping modern life. Embracing its advantages while managing its risks ensures a balanced and beneficial future.

Part 4: Free-response Question – Inference and Justification

What does the author imply about Maria's feelings towards the market? Why do you think your answer is the best?

Maria feels disconnected and overwhelmed by the market, which was once a source of joy and comfort. The author describes her friends as "preoccupied" and the market as "cold and distant," signaling a shift in her emotional connection to this familiar place. The contrast between her past and present feelings highlights her longing for peace and her struggle with the market's noise and energy.

This interpretation aligns with the text's vivid imagery of "unfamiliar faces" and her craving for silence, emphasizing her emotional fatigue.

Part 5: MAZE Task – Grammar and Sentence Structure

1. **a) occasions**

2. **b) customs**

3. **b) respect**

4. **b) expense**

Part 6:

1. **a) potential**

2. **b) pessimism**

3. **a) practical**

4. **b) customs**

5. **a) appropriate**

6. **a) electronic**

Part 7: Multiple-choice Questions

1. **b) Social media platforms**

2. **b) It can dilute the traditions' original meaning.**

3. **b) By creating virtual experiences**

4. **a) Diwali being celebrated in the United States**

5. **b) They raise both opportunities and concerns.**

Part 8: Multiple-choice Questions

1. **b) As the ability to focus on positive aspects**

2. **b) Learning from her failures**

3. **a) Pair it with careful planning**

Part 9: Multiple-choice Questions

1. **a) Germany and Sweden**

2. **b) Improved efficiency and affordability**

3. **b) Difficulty in storing energy effectively**

4. **b) Through subsidies and tax benefits**

5. **b) Some regions lack infrastructure and awareness.**

6. **c) Wind energy**

7. **b) Global cooperation and innovation are key to addressing energy challenges.**

Part 10: Multiple-choice Questions

1. **b) It personalizes learning based on individual needs.**

2. **b) It could reduce human interaction in learning.**

3. **b) By automating routine tasks like grading.**

<u>Comprehensive Grammar Test</u>

Passive Reporting Statements

Rule: *it + be + 'believed / reported / thought' + that + verb phrase*

1. It is _____ that the company will expand next year.
   a) believed
   b) think
   c) reported
   d) considering

2. It was _____ that the criminal had fled the country.
   a) thought
   b) considering
   c) believe
   d) thinks

3. It _____ that the new policy will reduce costs significantly.
   a) believes
   b) is thought
   c) reports
   d) thought

Present Continuous Passive

Rule: *subject + is/are + being + past participle*

4. The road _____ repaired, so expect delays.
   a) is being
   b) are being
   c) was being
   d) were being

5. The documents _____ scanned for errors at the moment.
   a) are being
   b) is being
   c) being
   d) have being

6. A new stadium _____ built to host the next World Cup.
   a) are being
   b) is being
   c) been
   d) was being

Second Conditional with "As If / As Though"

Rule: *'as if/as though' + complement clause (past simple; equivalent to second conditional)*

7. He speaks _____ he knew everything about the topic.
   a) as though
   b) like
   c) as if
   d) such as

8. She behaves _____ she didn't care about her reputation.
   a) as though
   b) as if
   c) so as
   d) if

9. You look _____ you've seen a ghost!
   a) as though
   b) as if
   c) like
   d) so that

Modals of Deduction

Rule: *Present - subject + 'must / can't / might / could' + base form of verb*

10. He _____ be home yet; his car is still in the driveway.
    a) must
    b) can't
    c) might
    d) could

11. She _____ know the answer; she wasn't in class yesterday.
    a) must
    b) might
    c) can't
    d) could

12. They _____ be arriving soon; their flight landed an hour ago.
    a) must
    b) might
    c) can't
    d) couldn't

Comparative Adjectives

Rule: *comparative phrase + 'than' + to infinitive*

13. It's easier _____ the bus than to drive in rush hour.
    a) take
    b) taking
    c) to take
    d) took

14. The house is much bigger _____ the one we used to live in.
    a) then
    b) than
    c) that
    d) to

15. He worked harder _____ anyone else in the team.
    a) than
    b) to
    c) that
    d) as

Superlative Adjectives

Rule: *superlative adjective + noun + 'that' clause*

16. This is _____ the most exciting film that I have ever seen.
    a) by far
    b) one of
    c) among
    d) far away

17. This is _____ the most delicious dessert I've had.
    a) among
    b) by far
    c) one of
    d) far from

18. She is _____ the most hardworking employee in the department.
    a) among
    b) far from
    c) by far
    d) one of

Comparing and Contrasting

Rule: *Adjectives, nouns, comparatives, superlatives*

19. Modern machines are more efficient _____ traditional tools.
    a) as
    b) than
    c) like
    d) to

20. This hotel is much cheaper _____ the one we stayed at last time.
    a) than
    b) to
    c) like
    d) as

21. In contrast _____ his usual performance, he did very well today.
    a) with
    b) than
    c) as
    d) by
