Part 5: MAZE 1

Read the text and **circle** the correct word(s) to fill the gap.

The Impact of AI on Industries

At the global technology summit, it _____ (1) [is reported / reports / was reported] that AI technology _____ (2) [is transforming / transforms / has transformed] many industries. Experts _____ (3) [must / might / can't] agree that AI could _____ (4) [brings / brought / bring] significant changes to how businesses operate, especially in fields like healthcare, finance, and education. If AI tools were developed more ethically, they would enhance productivity and improve decision-making processes worldwide.

1. It _____ that AI technology.

- a) is reported
- b) reports
- c) was reported

2. AI technology _____ many industries.

- a) is transforming
- b) transforms
- c) has transformed

3. Experts _____ agree,...

- a) must
- b) might
- c) can't

4. AI could _____ significant changes to how businesses operate.

- a) brings
- b) brought
- c) bring

Part 6: MAZE 2

Read the text and **circle** the correct word(s) to fill the gap.

The Role of AI in Modern Business

In today's rapidly evolving business landscape, it _____ (1) [**was reported / reports / is reported**] that artificial intelligence (AI) _____ (2) [**is revolutionizing / revolutionized / has revolutionized**] many industries. AI tools _____ (3) [**are used / are being used / were used**] to improve productivity, streamline operations, and enhance decision-making processes. It _____ (4) [**is believed / believes / is being believed**] that companies that adopt AI early _____ (5) [**must / can't / might**] gain a competitive edge over their competitors. Some experts argue that AI _____ (6) [**must / can't / might**] lead to job losses in certain sectors, but others believe it _____ (7) [**must / can't / will**] create new job opportunities. If companies _____ (8) [**had invested / invested / were to invest**] more in AI research, they would see significant long-term benefits.

1. it _____ that artificial intelligence.

- a) was reported
- b) reports
- c) is reported

2. Artificial intelligence _____ many industries.
- is revolutionizing
 - revolutionized
 - has revolutionized
3. AI tools _____ to improve productivity.
- are used
 - are being used
 - were used
4. It _____ that companies that adopt AI early.
- is believed
 - believes
 - is being believed
5. Companies that adopt AI early _____ gain a competitive edge over their competitors.
- must
 - can't
 - might

6. Some experts argue that AI _____ lead to job losses in certain sectors.

- a) must
- b) can't
- c) might

7. but others believe it _____ create new job opportunities.

- a) must
- b) can't
- c) will

8. If companies _____ more in AI research,...

- a) had invested
- b) invested
- c) were to invest

Part 7: Reading Text 1

Read the text and **circle** the correct answer to the question.

The Benefits of Urban Gardening

Urban gardening is becoming increasingly popular as people seek ways to grow their own food in cities. With the rise of apartment living and limited outdoor space, urban gardening offers a solution to food security and sustainability. Many urban dwellers are turning to containers, rooftops, balconies, and even indoor spaces to grow fruits, vegetables, and herbs.

One of the main benefits of urban gardening is that it allows people to have access to fresh, healthy food. Growing your own produce ensures that it is free from harmful pesticides and chemicals commonly found in store-bought goods. It also helps reduce the carbon footprint associated with transporting food long distances.

Urban gardening can also have positive effects on mental well-being. Spending time in nature, even in small amounts, has been shown to reduce stress and anxiety. Gardening allows people to connect with the natural world, which can improve their mood and sense of accomplishment.

Moreover, urban gardens help make cities greener. Green spaces, even small ones, improve air quality and reduce the heat island effect, where urban areas become significantly warmer than their rural surroundings. Urban gardening contributes to the beautification of neighborhoods, providing aesthetic value and enhancing community engagement.

However, urban gardening also presents challenges. Limited space, lack of sunlight, and the need for time and commitment are some of the factors that can make it difficult for people to maintain a garden. Additionally, access to affordable gardening materials can be a barrier for some city dwellers.

In conclusion, urban gardening offers numerous benefits, from healthier food options to improved mental health and greener cities. Despite the challenges, it remains a valuable practice for creating sustainable and vibrant urban environments.

1. What is one of the main benefits of urban gardening mentioned in the text?

- a) It requires very little space.
- b) It is easy to maintain and does not need much time.
- c) It allows people to grow their own fresh, healthy food.

2. How does urban gardening contribute to the environment?

- a) By increasing the number of cars in cities.
- b) By improving air quality and reducing the heat island effect.
- c) By encouraging people to travel to rural areas for fresh food.

3. What is a positive effect of gardening on people's mental health?

- a) Gardening can help people earn money.
- b) Spending time in nature can reduce stress and anxiety.
- c) Gardening leads to physical injuries, which help people stay healthy.

4. Which of the following is a challenge of urban gardening?

- a) The lack of sunlight and limited space for gardens.
- b) Finding fresh produce in cities.
- c) The high cost of store-bought food.

5. According to the text, what is one way urban gardening benefits communities?

- a) It encourages people to leave the city for vacations.
- b) It creates more job opportunities for gardeners in cities.
- c) It helps to beautify neighborhoods and engage the community.

Part 8: Reading Text 2

Read the text and **circle** the correct answer to the question.

The Journey Home

Lena had always loved visiting her grandmother's house in the countryside. It was a place of peace and beauty, surrounded by rolling hills and fields of wildflowers. However, this time the trip felt different. As the bus carried her away from the city, she couldn't shake the feeling of unease. The city, with its constant noise and crowded streets, had begun to feel more like home in recent years. The familiar buzz of traffic and the buzz of conversation had a strange comfort that the quiet of the countryside could no longer offer.

When Lena arrived at her grandmother's house, the peaceful landscape still held its charm, but there was a sadness in the air. Her grandmother had grown frail, and the house, once full of laughter, seemed quieter than it used to be. As she walked through the garden, Lena felt the weight of the passing years. The flowers her grandmother had carefully tended for decades were still beautiful, but some of them had begun to wilt.

Sitting on the porch, Lena took a deep breath and realized that her feelings had changed. The countryside, though still serene, no longer offered the escape it once had. She missed the energy of the city but also felt a new sense of responsibility and attachment to the place where she had spent so many childhood summers. In that moment, Lena understood that home wasn't just a place—it was where the heart could find peace, whether it be in the bustling streets or the quiet hills.

- 1. What is the main feeling Lena experiences as she returns to her grandmother's house?**
 - a) Excitement
 - b) Unease
 - c) Joy

- 2. How does the tone of the text change as Lena spends time at her grandmother's house?**
 - a) Hopeful to sad
 - b) Confused to excited
 - c) Nostalgic to despondent

- 3. What does Lena realize about "home"?**
 - a) It's where she feels peace.
 - b) It's tied to the countryside.
 - c) It's the city, not the countryside.

Part 9: Reading Text 3

Read the text and **circle** the correct answer to the question.

The Role of Pollinators in Ecosystems

Pollinators, such as bees, butterflies, and bats, are crucial for the survival of many plants and crops. These organisms help transfer pollen from one flower to another, a process known as pollination. Pollination is essential for plants to reproduce, and without it, many plants would fail to produce seeds, leading to a dramatic decrease in plant biodiversity. In fact, about 75% of flowering plants worldwide rely on pollinators for reproduction, which means that the health of ecosystems is directly tied to the health of pollinators.

The importance of pollinators extends far beyond plants. Many of the foods humans rely on, including fruits, vegetables, and nuts, depend on pollination. Crops like almonds, apples, strawberries, blueberries, and tomatoes are all pollinated by insects, primarily bees. For instance, it takes around 2 million flowers to produce just one pound of almonds, and bees are responsible for pollinating over 90% of the world's almond crop. Without pollinators, not only would there be a loss of plant life, but global food systems would be severely disrupted, leading to food shortages, economic challenges, and an increase in the cost of food.

However, pollinators are facing serious challenges in today's world. Habitat loss, the widespread use of pesticides, and climate change are all significant contributors to the decline in pollinator populations. As urban areas expand and natural habitats shrink, pollinators lose the flowers and plants they depend on for food. The widespread use of pesticides in agriculture can harm pollinators by poisoning them or disrupting their behavior, such as interfering with their ability to navigate. Climate change has also altered flowering times and migration patterns, making it harder for pollinators to find food at the right times.

Efforts to protect pollinators have been growing in recent years, as their role in maintaining biodiversity and food security becomes clearer. Conservationists have been working to create pollinator-friendly habitats by planting diverse species of flowers and reducing the use of harmful pesticides. In some regions, governments have introduced initiatives to support pollinator populations, such as establishing protected areas or providing financial incentives for farmers to adopt pollinator-friendly practices. Public awareness campaigns have also helped to educate people about the importance of pollinators and how to protect them, such as planting more native flowers in gardens.

credible information. As the role of social media in education continues to evolve, it will be crucial for educators to balance its advantages with its potential risks.

1. What is the primary role of pollinators in ecosystems?

- a) To protect plants from pests
- b) To help plants grow faster
- c) To transfer pollen between flowers

2. Which of the following crops relies most heavily on bees for pollination?

- a) Wheat
- b) Apples
- c) Rice

3. What is one of the major threats to pollinators mentioned in the passage?

- a) Overproduction of crops
- b) Climate change
- c) Increased rainfall

4. According to the passage, what is the consequence of pollinator decline?

- a)) A decrease in plant and crop reproduction
- b) An increase in biodiversity
- c) More frequent plant diseases

5. What are some of the actions being taken to protect pollinators?

- a) Reducing the use of fertilizers
- b) Creating pollinator-friendly habitats
- c) Growing fewer flowering plants

Part 10: Reading Text 4

Read the text and **circle** the correct answer to the question.

The City at Dawn

As the first light of dawn spread across the city, the streets remained eerily quiet. The usual rush of cars and people had not yet begun, and the air was still cool, tinged with the faint scent of morning dew. For a brief moment, the city seemed peaceful, almost untouched by the constant movement and noise that would soon fill it.

Lena sat on a bench in the park, her coffee cup held loosely in her hands. She watched as a few joggers passed by, their rhythmic footsteps a quiet reminder of the world moving on without her. She had always loved this time of day, when the city was in transition—from the calm of the early hours to the frenetic energy of midday. It was in these quiet moments that she could think clearly, without the distractions of her busy life.

But today was different. As she took another sip of her coffee, she couldn't shake the feeling of unease that had settled over her. The upcoming meeting weighed on her mind, the unknowns of her future looming large. The path ahead was uncertain, and Lena had to make a decision that would affect not only her life but also the lives of those around her. The city, once a symbol of opportunity, now seemed like a maze—its streets twisting and turning, leading to places she wasn't sure she wanted to go.

The sun finally broke through the horizon, casting golden light on the buildings and streets. The quiet moment was over, and the city was waking up. Lena stood, took a deep breath, and headed back toward the world she knew was waiting.

credible information. As the role of social media in education continues to evolve, it will be crucial for educators to balance its advantages with its potential risks.

1. What is the mood of the passage?

- a) Peaceful and reflective
- b) Hopeful and energetic
- c) Chaotic and stressful

2. How does Lena feel about the city at the beginning of the passage?

- a) She feels connected to it and at ease.
- b) She feels detached and uncertain about her future.
- c) She feels excited and full of anticipation.

3. What does the city symbolize for Lena as the passage progresses?

- a) A place of freedom and endless possibilities
- b) A place of stability and comfort
- c) A place of uncertainty and decision-making
