Assessment Resource Book

The Assessment Resource Book provides the following resources. Assessments can be completed in print or digitally.

COURSE ASSESSMENTS

Course Diagnostic assesses student's readiness for grade-level content as they enter a new school year.

Benchmark Assessments help monitor student progress towards grade-level expectations.

Summative Assessment evaluates student learning at the end of each grade level.

UNIT ASSESSMENTS

Unit Readiness Diagnostics assess each student's proficiency with pre-requisite skills to determine readiness for the unit content.

Unit Assessments measure multiple depths of knowledge to assess for various stages of understanding. Two forms of the assessment allow for flexibility.

Performance Tasks assess students' understanding of big ideas and their ability to apply unit content to solve real-world problems. In addition, practice performance tasks are available as part of the unit review materials.

LESSON ASSESSMENTS

Exit Tickets assess student understanding of lesson content and drive differentiation.

Differentiation Resource Book

Unit 2: Use Place Value to Fluently Add and Subtract within 1,000

- Reinforce Understanding
- Extend Thinking

Lesson 2-1 · Reinforce Understanding Represent 4-Digit Numbers

This material may be reproduced for licensed classroom use only and may not be further reproduced or distributed.

_	_	 -	_	
				•••••••

Name

Review

You can use place value to represent 4-digit numbers.

thousands	hundreds	tens	ones
			8888

ľ	2	1	4	4
ſ	thousands	hundreds	tens	ones

standard form: 2,144

written form: two thousand, one hundred forty-four

```
expanded form: 2,000 + 100 + 40 + 4
```

Fill in the number represented by the base-ten blocks. Write the number in expanded and word form.

thousands	hundreds	tens	ones	2.	thousands	hundreds	tens	ones
			0 0 0 0 0					00000
thousands	hundreds	tens	ones		thousands	hundreds	tens	ones

Lesson 2-1 • Extend Thinking

Represent 4-Digit Numbers

Name

Use the digits to write a number with the greatest possible value. Then write a number with the least possible value. Write each number in standard form, expanded form, and word form.

		5	9	8	6
1.	Greatest:				
	Expanded form:				
	Word form:				
2.	Least:	_			
	Expanded form:				
	Word form:				
2	Cuestast	8	1	5	7
3.	Greatest:	8	1	5	7
3.	Greatest: Expanded form:	8	1	5	7
3.	Greatest: Expanded form: Word form:	8	1	5	7
3.	Greatest: Expanded form: Word form:	8	1	5	7
3.	Greatest: Expanded form: Word form: Least:	8	1	5	7
3.	Greatest: Expanded form: Word form: Least: Expanded form:	8	1	5	7
3.	Greatest: Expanded form: Word form: Least: Expanded form:	8	1	5	7

Lesson 2-2 · Reinforce Understanding Round Multi-Digit Numbers

Name

Review

You can use a number line or place-value to round numbers. Round 487 to the nearest 10 and nearest 100.

Use place value to round.

Differentiation Resource Book

This material may be reproduced for licensed classroom use only and may not be further reproduced or distributed.

Name

Solve.

Keisha is shopping. She has \$100. She wants to buy colored pencils for \$16, 3 sketchpads for \$12 each, a set of paints for \$15, and a set of paintbrushes for \$19. Show how Keisha can use rounding to make sure that she has enough money.

- **2.** A number rounded up to the nearest ten is 20.
- **3.** A number rounded down to the nearest ten is 10.
- **4.** A number rounded up to the nearest hundred is 100.

Lesson 2-3 · Reinforce Understanding Estimate Sums and Differences

Name

Review

You can use compatible numbers to estimate when an exact sum or difference is not needed.

Mr. Conner spent \$122 at the hardware store. Mrs. Basminji spent \$276. About how much more did Mrs. Basminji spend?

$$276 - 122 = ?$$

 \downarrow
 $275 - 125 = 150$

Mrs. Basminji spent about \$150 more.

Estimate the difference. Show your work.

1. 298 - 207 = ? **2.** ? = 496 - 104

Estimate the sum. Show your work.

3. ? = 416 + 147 | **4.** 274 + 516 = ?

Copyright © McGraw-Hill Education

Lesson 2-3 · Extend Thinking Estimate Sums and Differences

Name

Estimate or use compatible numbers to solve. Show your work.

1. Nilda has 536 packages to ship. If she has shipped 94 packages in each of the last 2 hours, about how many packages does she have left to ship?

___ packages

Show another way to adjust numbers to solve the problem.

packages

2. Marcella owns a pack and ship store. Her goal is to move 275 packages a day. If, she has shipped 61 packages in each of the last 3 hours, about how many more packages does she have to move to meet her goal?

_ packages

Show another way to adjust numbers to solve the problem.'

This material may be reproduced for licensed classroom use only and may not be further reproduced or distributed

packages

Lesson 2-4 · Reinforce Understanding **Use Addition Properties to Add**

This material may be reproduced for licensed classroom use only and may not be further reproduced or distributed.

Name

Review

You can use properties of addition to help you add. 63 + 30 + 17 = ?

You can switch the order of the addends and the sum will be the same.

You can group the addends in any way and the sum will be the same. 17 + 63 + 30 = ?

7

80 + 30 = 110

Complete using properties of addition.

- **1.** 315 + 435 = 435 +
- **2.** 273 + 28 + = 56 + 28 + 273
- **3.** +23+12=12+ +72
- **4.** 100 + 23 = 23 + 407 +

Show one way to group the addends to solve. Solve

5. 145 + 13 + 387 =

6. 125 + 228 + 72 =

Lesson 2-4 · Extend Thinking Use Addition Properties to Add

Name

Solve. Show your work.

1. Mr. Reneke is a manager at the Holiday Hotel and is checking his bank deposit. He is adding \$205, \$450, and \$295. How can he use both properties of addition to add more efficiently?

 Kiara is checking hotel laundry receipts for one of her customers. His laundry charges for the past three months were \$150, \$175, and \$125. How can she use both properties of addition to add more efficiently?

3. Nestor works at the Holiday House restaurant. He is checking the total cost of the tableware he ordered. He ordered dinner plates for \$415, bread plates for \$185, and bowls for \$160. How can he use both properties of addition to add more efficiently?

Lesson 2-5 · Reinforce Understanding Use Addition Properties to Add

Name

Review

You can use addition patterns to find and check sums. When you add **even numbers** and **odd numbers**, there are patterns in the sums.

even + even =
evenodd + odd = even
57 + 55 = 112even + odd = odd
422 + 177 = 59914 + 22 = 36
342 + 224 = 566247 + 255 = 502odd + even = odd
383 + 300 = 683

Find and check the sum. Match to the correct statement.

1.	75 + 11 =	even = even + even
2.	64 + 14 =	
3.	29 + 29 =	even = odd + odd
4.	42 + 38 =	
5.	221 + 314 =	odd + even = odd
6.	44 + 17 =	
7.	23 + 14 =	even + odd = odd
8.	302 + 101 =	

Copyright © McGraw-Hill Education

Lesson 2-5 · Extend Thinking Use Addition Properties to Add

Name

What Addition Equations Can I Be? My addends are numbers from 24 through 29. My sum is odd. What are the possible equations?

Lesson 2-6 · Reinforce Understanding Use Partial Sums to Add

Name

Review

You can use the partial sums strategy to add. One way to break apart numbers is by place value.

addends in a row	addends stacked
158 + 256 = ?	158
100 + 200 = 300 50 + 50 = 100 8 + 6 = 14 300 + 100 + 14 = 414	$100 + 200 \longrightarrow 300$ $50 + 50 \longrightarrow 100$ $8 + 6 \longrightarrow + 14$ $4 1 4$

Break apart each addend. Then add to find the sum.

1. 324 + 135 =

Stack the addends to find the sum. Show your work.

Copyright © McGraw-Hill Education

2. 163 +225	3. 456 +322
+	+

Differentiation Resource Book

Lesson 2-6 · Extend Thinking Use Partial Sums to Add

Name

Use a 0-9 spinner. Spin to make two 3-digit addends. Show how to use the partial sums strategy to find the sum.

2. _____ + ____ = _____

3. _____ + ____ = _____

Lesson 2-7 · Reinforce Understanding

Decompose to Subtract

Name

Review

Numbers can be decomposed or "broken apart" in different ways to find the difference.

One Way	Another Way	Pick a number that is
353 – 184 = ?	353 - 184 = ?	easy to subtract from a part when choosing
353 – 100 = 253	353 – 153 = 200	compatible numbers.
253 – 80 = 173	200 – 30 = 170	
173 – 4 = 169	170 – 1 = 169	
353 - 184 = 169	353 - 184 = 169	

Decompose one number to subtract.

2. _____ = 253 - 132

4. 383 – 282 =

Lesson 2-7 • Extend Thinking

Decompose to Subtract

Name

Roll a number cube to generate two 3-digit numbers. Write a subtraction problem with the greatest number as the first number. Show two ways to decompose one number to subtract.

1. _____ = _____

2. _____ = _____

3. _____ = _____

Lesson 2-8 · Reinforce Understanding Adjust Numbers to Add or Subtract

Name

Adjust both numbers to keep the sum or difference the same as the original.

Adjust each equation and find the difference. Show your work.

- **1.** 479 98
- **2.** 158 46

Adjust each addition equation and find the sum.

his

Lesson 2-8 · Extend Thinking Adjust Numbers to Add or Subtract

Na	me	
Δς	stadium is using game attendance numbers	Fans per Team
fro	m last year to adjust their seating. The table	Jets - 291
shows the number of fans per game that		Rams - 406
att	ended to support each team.	
1.	The first game of the year is the Stars versus	Jaguars – 187
	the Bears. Write an equation showing the	Stars - 388
	number of fans the stadium can expect.	Bears - 347
	Adjust the equation and solve.	

- The last game of the year is the Rams versus the Jaguars. Write an equation showing the number of fans the stadium can expect. Adjust the equation and solve.
- **3.** For which game should the stadium expect the highest attendance. Why? Write, adjust, and solve an equation to support your answer.
- **4.** Which two teams have the most similar attendance? Explain your answer. Write, adjust, and solve an equation to support your reasoning.

Lesson 2-9 · Reinforce Understanding Use Addition to Subtract

Name

Review

You can solve a subtraction problem by writing a related addition equation with an unknown addend. The unknown difference is the same number as the unknown addend.

Solve. 543 – 261 = ?

Think: 261 plus a number equals 543.

Write: 261 + ? = 543

543 - 261 = **282** 261 + **282** = 543

Write a related addition equation for each subtraction equation.

1. 845 – 193 = ?	
2. 679 – 291 = ?	
3. 712 – 436 = ?	
4. 363 – 192 = ?	

Write a related addition equation for each subtraction equation. Solve each problem.

5.	34 - 122 = ?
6.	91 – 356 = ?
7.	04 - 277 = ?
8.	80 - 173 = ?
9.	a survey, 523 students had 2 siblings and 355 students had

In a survey, 523 students had 2 siblings and 355 students had
 1 sibling. How many more people had 2 siblings?

Lesson 2-9 · Extend Thinking Use Addition to Subtract

Name

The table shows the results of a survey about pet ownership.

 How many more people own 2 pets than 1 pet? Write both an addition and a subtraction equation.

- **2.** How many more people own 2 pets than 3 pets? Write both an addition and a subtraction equation.
- Sam uses the survey results to write a third subtraction equation. He uses the related addition equation 312 + ? = 474 to help him find the missing difference. What question is Sam trying to answer? Explain.

4. What is a question you could ask about the number of people who own 4 pets? Write both an addition and a subtraction equation to answer your question.

Lesson 2-10 · Reinforce Understanding Fluently Add Within 1,000

Name

Review

You can use different strategies to find a sum.

Partial SumsAdjust Addends352352 + 117 = ? $300 + 100 \rightarrow 400$ 400 $50 + 10 \rightarrow 60$ -2 + 2 $2 + 7 \rightarrow + 9$ 469350 + 119 = 469

Use partial sums to find the sum.

Adjust the addends to find the sum.

1. 258 + 421

2. 604 + 242

Use a strategy to find each sum. Show your work.

3. 312 + 524	4. 706 + 183
5. 422 + 228	6. 293 + 681

Differentiation Resource Book

This material may be reproduced for licensed classroom use only and may not be further reproduced or distributed.

Lesson 2-10 · Extend Thinking Fluently Add Within 1,000

Name

On Monday, Kyle's family drove 247 miles. The next day, they drove 184 more miles than the day before. On the final day, they drove 312 miles.

1. How many miles did they drive on Tuesday? Solve the problem using partial sums.

2. How many miles did they drive during the first two days of the trip? Solve the problem using adjusted addends.

3. How many miles did they drive during the entire trip? Use either partial sums or adjusted addends.

Lesson 2-11 · Reinforce Understanding Fluently Subtract Within 1,000

Name

Review

You can use different strategies to find a sum.

Solve. 459 – 261 = ?

Decompose	Adjust Numbers	Related Addition
One Number	459 + 1 = 460	Equation
$ \begin{array}{r} 4 5 9 \\ - 2 0 0 \\ 2 5 9 \\ - 5 0 \\ 2 0 9 \\ - 1 0 \\ 1 9 9 \\ - 1 9 8 \\ \end{array} $	$261 + 1 = 262$ $4 \ 6 \ 0$ $- 2 \ 6 \ 0$ $- 2 \ 0 \ 0$ $- 2$ $1 \ 9 \ 8$	459 - 261 = 198 261 + 198 = 459

Use a strategy to find the difference. Show your work.

Copyright © McGraw-Hill Education

2. 867 – 342 = ? _____ **4.** 598 – 364 = ? _____

Lesson 2-11 · Extend Thinking Fluently Subtract Within 1,000

Name

Jan sold a total of 752 tickets to baseball games this week. The table shows the number of tickets sold on the days of the week.

Day of the Week	Number of Tickets Sold
Sunday	225
Monday	216
Tuesday	83
Wednesday	47
Thursday	38
Friday	31
Saturday	?

- Is the difference between the number of tickets Jan sold on Sunday and Wednesday greater than, less than, or equal to the difference between the number of tickets she sold on Monday and Thursday? Explain your answer.
- **2.** How many tickets did Jan sell on Saturday? Show your work.
- **3.** How many more tickets did Jan sell on the day she sold the most tickets than she did on the day she sold the least?

Copyright C McGraw-Hill Education

How Can I Solve Two-Step Problems Involving Addition and Subtraction?

Name

Review

Julius works at an orchard.for two days. On the first day, he picks 231 apples. On the second day, he picks 16 fewer apples than on first day. How many apples does he pick this week?

Step One	Step Two
How many applesdoes he pick on the second day?	How many apples does he pick this week?
231 - 16 = a	231 + 215 = b
231 - 1 = 230	231 + 200 = 431
16 - 1 = 15	431 + 10 = 441
230 - 15 = 215	441 + 5 = 446
He picks 215 apples on the second day.	He picks a total of 446 apples this week.

Solve. Show your work.

- 1. Lola walked Monday, Tuesday, and Wednesday for a total of 270 minutes. She walked 112 minutes on Monday and 86 minutes on Tuesday. How long did she walk Wednesday?
- 2. Liam drove 462 miles Friday. He drove 21 more miles on Saturday than he did on Friday. How many total miles did Liam drive those two days?

Lesson 2-12 • Extend Thinking

How Can I Solve Two-Step Problems Involving Addition and Subtraction?

Name

Renee worked Monday through Friday this week for a total of 40 hours. On Monday, she worked six hours. On Tuesday, she worked three more hours than on Monday. On Wednesday, she worked five fewer hours than on Tuesday. On Thursday, she worked seven more hours than on Wednesday.

1. How many hours did Renee work Monday through Thursday? Complete the table.

Day of the Week	Number of Hours Worked
Monday	6
Tuesday	
Wednesday	
Thursday	
Friday	

2. She is paid \$8 per hour. How much did she get paid for each day? Complete the table.

Day of the Week	Wages (\$)
Monday	48
Tuesday	
Wednesday	
Thursday	
Friday	

3. How much did Renee get paid for the week?
