**Read the text and answer the questions**

Robobee

Scientists have invented a tiny flying robot called “Robobee”. Scientists hope that, in the future Robobee will be able to do many things. Just like the real bees. Robobee will carry pollen (yellow powder) from flower to flower on farms. The flowers need the pollen so that fruit and vegetables can grow. Robobee will also fly through tiny holes in dangerous places, taking photographs for the scientists. And they will help people who are trapped in fallen buildings. In hospitals, robots help doctors. A doctor sits at a computer and shows the robot what to do. The robot arms hold tiny tools and lights. The tiny tools can reach places that a doctor’s hands can’t reach, like inside a patient’s brain.

**Choose the correct answer to complete the sentence:**

1-The text is talking about -----

- a. the buildings                      b. the flowers                      c. the robot

2- The robobee will be able to -----

- a. swim in the ocean  
b. carry pollen from one flower to another  
c. hide the people

**Answer the following questions:**

3- Why does the flower need pollen?

-----  
-----
