### The Amazing Amazon

I'm Huda. I live in the Amazon rainforest. There are many interesting animals and birds. I'm studying them so that I can write a book about them.

The forest is very noisy. I didn't sleep at all in the first week. I missed my family and friends too. Now, I love being here.

There are lots of monkeys near my camp. Monkeys can climb trees very quickly. This morning, I tried to take some photos of them. They didn't come close enough, so my photos are not very good.

I am hoping to find jaguars. They are big cats. They sleep during the day and only come out at night. They can see very well in the dark. Yesterday, I heard one, but I didn't see it. I can't look for them at night because it is too dangerous. During the day, they sleep in the trees so I can't see them there. I think I should wait near the lake. When they are thirsty, they might come there to drink. I could see them then.

Read the text and answer the questions.

1 - 5      علامة 18.75

**Huda is staying in the rainforest because she is \_\_\_\_.**

- a. interested in the plants
- b. learning about the wildlife
- c. writing a book about herself

This story is about \_\_\_\_ in the rainforest.

a. dangerous animals

b. someone staying

c. loud noises at night

### The Sahara Desert

The Sahara Desert is in Africa. It covers eleven different countries, including some of Egypt in the east. It's west of Ethiopia and north of Ghana.

The Sahara has very hot weather most of the time. During the day, the temperature is often over 38 degrees. Many people think it is a beautiful place and they like all the animals living there. However, it is difficult to be comfortable there. It is hard for people living in the desert to get to a shop. They can't buy food and water easily.

Most of the animals that you can find in the desert are small, so they don't need a lot to eat. Snakes and scorpions stay under rocks and catch insects to eat. You shouldn't go near them. They could hurt you.

The addax is a big, white animal that lives in the Sahara. During the day, when the sun is hot, it is usually sleeping. At night, it eats small plants. Some snakes live in the plants, but the addax is not worried about them. It uses its long flat feet to walk easily

### The Zoo

I have never been able to go to the zoo because I'm at school when it is open. Last week at school, however, the teacher said, "We are all going to the zoo." I was very excited and I wanted to learn more about the animals that live there. I read in a book that zoos may not be the best homes for animals because they don't have much space. Even safari parks are not the best place because animals cannot move where they want to. It also said that the best place for animals to live is the wild because they have lots of room.

When we got to the zoo, I couldn't believe how sad the animals looked. The guide told us how it all started.

He said, "Some rich people in Egypt wanted to show that they had a lot of money. They kept expensive, wild animals in their houses. The people couldn't understand how the animals felt. They took the wild animals from their dangerous but beautiful homes in large forests, clean, open waters and the clear blue sky. They then put them in small places for other people to see."

I think the lions looked the saddest. They were not moving very
