REVIEW LESSON

11. Exploring Land Resources

Explore

100%

Which of the following is an example of a natural resource?

ATTEMPT 1

organisms

minerals

plastics

clouds

ATTEMPT 1

Drag and drop the answer to correctly complete the sentence.

An example of a natural resource is

1. land

↕ mining

↕ plastic

↕ organisms

1. land

ATTEMPT 1

Select your answer from the drop-down menu.

1. Living space includes natural habitats and the land that mosques, homes, and roads are built on.

1. Living space

People use minerals to

1. make building materials ✓

✚ fuel vehicles

✚ create paper products

✚ reduce global temperatures

Word Bank

metallic

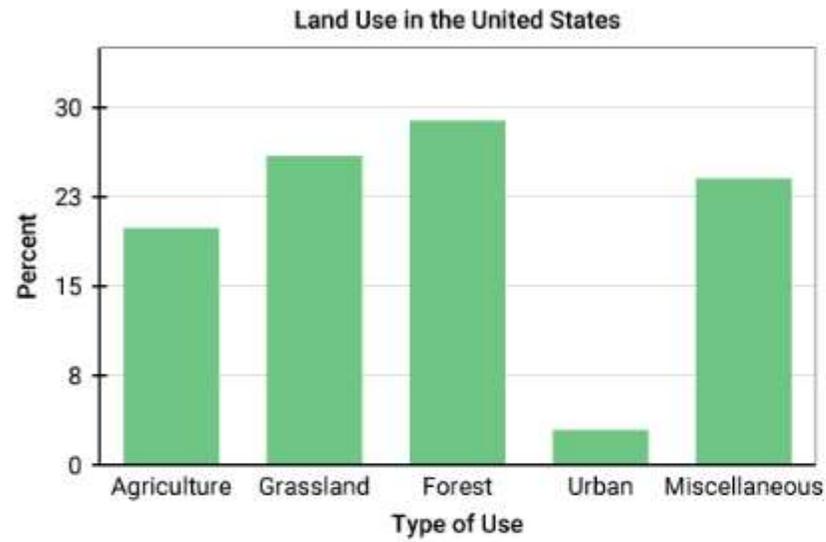

nonmetallic

gaseous

liquid

Lithium is used to make batteries. Lithium is a 1. metallic ✓ resource.

Based on the data, which type of land use is least popular in the United States?

ATTEMPT 1

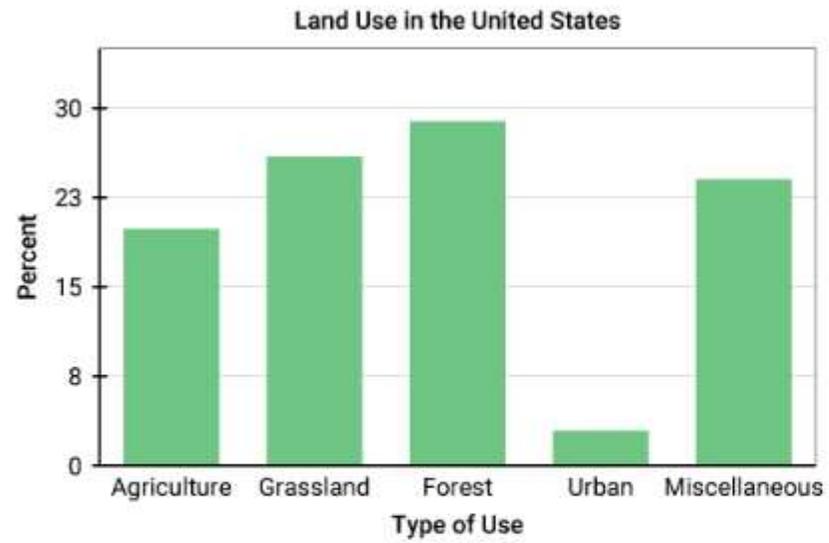

forest

grassland

urban ✓

agriculture

Based on the data, what is **most** of the land in the United States used for?

forest

agriculture

urban

grassland

Drag and drop the answer to correctly complete the sentence.

People use soil to

1. grow crops ✓

✚ catch runoff

✚ protect organisms

✚ filter chemicals

What are soil, wood, and minerals examples of?

ATTEMPT 1

fuel

natural resources

fossil fuels

metallic ores

Which of the following is an advantage of using the land as a resource?

ATTEMPT 1

The use of land increases the use of fossil fuels.

Soil and forests are easy to access.

It requires cutting down many trees.

All land resources are nonrenewable resources.

Apply

100%

Which of the following is released as a waste product of burning fossil fuels?

ATTEMPT 1

compost

chemicals

carbon dioxide

runoff

Which of the following is a consequence of deforestation?

ATTEMPT 1

increased living space for organisms

soil erosion

less runoff

more balanced climates around the world

What is an advantage of using trees and crops as a resource?

They are not easy to access.

They are nonrenewable resources.

They take a very long time to grow.

They can be planted and regrown in a short period of time.

What is the process of clearing large areas of forests for human activities called?

runoff

pollution

mineral mining

deforestation

ATTEMPT 1

Fill in the blank with the correct answer to complete the sentence.

Word Bank			
Deforestation	Reclamation	Planting Trees	Pollution

1. deforestation affects the environment because it causes the loss of habitat for many organisms.

Rivers, ponds, and underground water are examples of water sources that are polluted by **1. runoff** ✓ ▼ from mineral mines.

1. runoff

Why are some minerals nonrenewable resources?

They are easily accessible.

They exist in unlimited quantities.

They are easily replaced in a short amount of time.

They take millions of years to form.

How do trees help maintain global temperatures?

ATTEMPT 1

- They serve as a thermal layer around the world, trapping heat.
- They absorb carbon dioxide from the atmosphere.
- They use oxygen from their leaves to offset the fossil fuels that are burned.
- They release fossil fuels when they are cut down or burned.

ATTEMPT 1

Select your answer from the drop-down menu.

Governments pass laws that 1. preserve ✓ ▼ forests and ecosystems.

1. preserve

Which of the following is an activity that the government controls on preserved land?

types of trees grown on the land

bird populations on the land

development of the land

animal habitats on the land

Relate

100%

How can collected compost be used to help crops grow?

ATTEMPT 1

- It can help remove moisture from soil.
- It can be used as fertilizer.
- It can increase soil erosion.
- It can be used as a water source.

On preserved land, which of the following activities permits trees to be cut down?

planting new trees to replace those that were cut down

cutting down all trees

using the land for development

closing all forest land

Who passes laws that preserve land resources?

doctors

farmers

government officials

teachers

ATTEMPT 1

Drag and drop the answer to correctly complete the sentence.

Reclamation  is an activity that governments can control in an effort to preserve the land.

 Composting

 Reclamation

 Recycling

 Logging

Select your answer from the drop-down menu.

Governments can pass laws that preserve forests and ecosystems by controlling the mining of 1. minerals ✓ ▼.

1. minerals

Word Bank

polluting

recycling

destroying

damaging

You and your community can help conserve land resources by **1. recycling** any products that are made from land resources.

Which of the following farming methods does not harm the environment with chemicals?

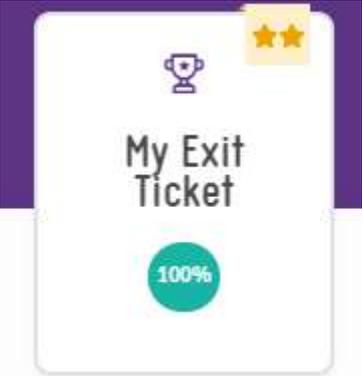

ATTEMPT 1

burning crops

organic farming

spraying pesticides to the soil

adding fertilizer to the soil

Word Bank			
Compost	Runoff	Pollution	Ore

1. compost ✓ is decayed organic material used as a fertilizer for growing plants.

Which of the following is a disadvantage of using land resources?

It can take millions of years for some land resources to form. ✓

Most land resources are easily accessible.

Using land resources can create more living space.

Organisms benefit from using up land resources.

1. Ores ✓ ▼ are naturally occurring minerals that can be mined to earn a profit by producing different materials.

1. Ores

How can you tell if a mineral is metallic or nonmetallic?

I check if it can be used to make metal products.

I check if it is used to build things.

I check if it is mined.

I check if it causes pollution.
