## Response Review

Student ID/Username:

s680664

Full Name:

سجحه محمد عوض احمد شعوان

Group/CRN:

\$PC-1085AD-G7-GEN-2 (9...

Delivery Method:

Digital

College:

Grade7

Course Name:

G7GEN.SCI - Science G7

Area/Branch Name:

AL SHIYAM (1085AD) الشيم

Exam:

Grade 7 - General - Inspire...

Activity Type:

Final

Time Spent:

57 mins, 35 secs

Total Marks:

70/80

Which of the following you would use to detect and measure the damage of an earthquake in the following figure?

**Learning Outcomes Covered**

- SCI.2.1.02.005

a.

Modified Mercalli Intensity scale

b.

Moment Magnitude scale

c.

Seismograph scale

d.

Saffir–Simpson scale

Which of the following is **NOT** studied by geologists to predict volcanic eruptions?

**Learning Outcomes Covered**

- SCI.2.1.02.005

a.

Ground deformation

تم تحميل هذا الملف من

b.

موقع المناهج الإماراتية  
Earthquake swarms

c.

Change in shape of the volcano

d.

Animal behavior

The Andes mountains is formed as the oceanic denser plate “Nazca Plate” is forced under the “South American Plate”,  
What is the name of this process?

**Learning Outcomes Covered**

- SCI.2.3.05.004

تم تحميل هذا الملف من

a.

Fault

alManahj.com/ae

b.

Subduction

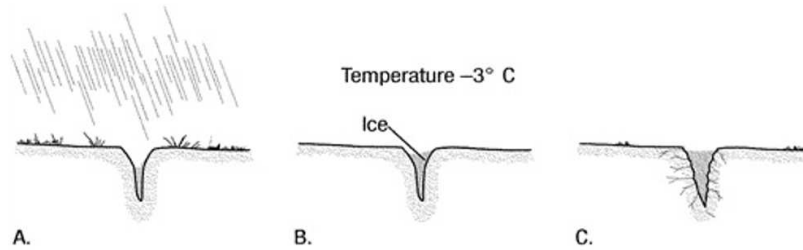

c.

Transformation

d.

Divergent

Which best explain the process occurring in the figure below?

### Learning Outcomes Covered

- SCI.2.3.01.013
- SCI.2.3.02.001

تم تحميل هذا الملف من  
موقع المناهج الإماراتية

a.

It is a chemical change from the plant's roots

alManahj.com/ae

b.

It is a chemical change from changing the water to ice

c.

It is a physical change for the soil chemical composition

d.

It is a physical change in Earth's surface

Which classification of tornado on the Enhanced Fujita scale does the most damage?

**Learning Outcomes Covered**

- SCI.2.1.02.005
- SCI.2.3.01.011

a.

EF0

b.

EF2

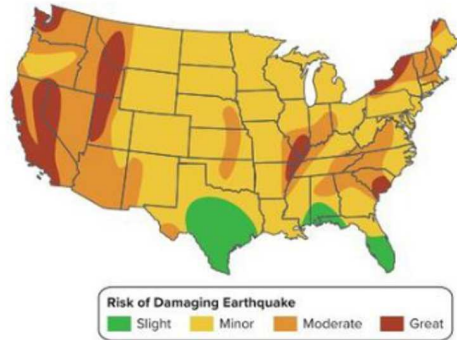

c.

EF4

d.

EF5

What can be inferred about the locations with only slight or minor earthquake risk using the map below?

**Learning Outcomes Covered**

- SCI.2.3.05.001

a.

These locations have too low of an elevation for earthquakes to occur

b.

These locations are not located on or near a plate boundary or fault line

c.

These locations are too mountainous for earthquakes to occur

d.

These locations are too far from the San Andrea Fault to be affected by an earthquake

Study the table below, which of the following is correct?

1	2
	
Molten rocks cool slowly	Molten rocks cool so quickly

#### Learning Outcomes Covered

- SCI.2.3.05.002

a.

1 is called intrusive rock, their mineral crystals are very small in size

b.

2 is called extrusive rock, their mineral crystals are very small in size

c.

1 is called extrusive rock, their mineral crystals are large in size

d.

Both 1 and 2 cools on the Earth's crust, where its lower temperature than its core

Study the map below, which of the following is correct?

Learning Outcomes Covered

- SCI.2.3.05.002
- SCI.2.3.05.005

تم تحميل هذا الملف من  
موقع المناهج الإماراتية

a.

A is an example of the ocean trenches

b.

B is a vast mountain ranges deep below the ocean's surface called mid-ocean ridges

c.

B is the marina trench which is the deepest landform on Earth

d.

A is a shallow-water ocean features and landforms

The following figure shows a type of sedimentary rocks that is formed when minerals crystallize from water during dry conditions, under which of the following types it belongs to?

**Learning Outcomes Covered**

- o SCI.2.3.05.002

a.

Clastic

b.

Chemical

c.

Biochemical

d.

Gneiss

Q.10: P1: magnitude of earthquake

Mark(s): 5/5

Using the seismograph to compare the measured magnitude of two different earthquakes, how much shaking does a magnitude 4 earthquake produce compared to a magnitude 2 earthquake?

Learning Outcomes Covered

- SCI.2.3.05.001

a.

2

b.

10

c.

100

d.

1000

What two specific continents fit together most noticeably?

**Learning Outcomes Covered**

- SCI.2.3.05.005

a.

Africa and Australia

b.

South America and Europe

c.

South America and Africa

d.

Antartica and Africa

What type of mountains are formed when molten rock erupts onto Earth's surface and hardens?

**Learning Outcomes Covered**

- SCI.2.3.05.002
- SCI.2.3.05.004

a.

Uplifted mountains

تم تحميل هذا الملف من

b.

Fold mountains

موقع المناهج الإماراتية  
alManahj.com/ae

c.

Volcanic mountains

d.

Fault-block mountains

Which of the following types of volcanic hazards shown in the figure below that move at speeds of more than 100 km/hr and have temperatures over 1,000°C?

**Learning Outcomes Covered**

- SCI.2.1.02.005

a.

Pyroclastic Flows

b.

Mudflows

c.

Volcanic Ash

d.

Volcanic gases

What is the correct order of the ocean-floor features (using the numbers on the map below) from the oldest to the youngest?

### Learning Outcomes Covered

- SCI.2.3.05.002
- SCI.2.3.05.005

تم تحميل هذا الملف من  
موقع المناهج الإماراتية

a.

1 > 2 > 3 > 4

Oldest → youngest

b.

4 > 3 > 2 > 1

Oldest → youngest

c.

$1 > 4 > 3 > 2$
Oldest $\rightarrow$ youngest

d.

$4 > 2 > 1 > 3$
Oldest $\rightarrow$ youngest

Which of the following is the correct name for the Earth's feature shown in the figure below due to the impact of meteoroid?

**Learning Outcomes Covered**

- SCI.2.3.05.002
- SCI.2.3.05.004

تم تحميل هذا الملف من

موقع المناهج الإماراتية

a.

Impact craters

alManahj.com/ae

b.

Impact holes

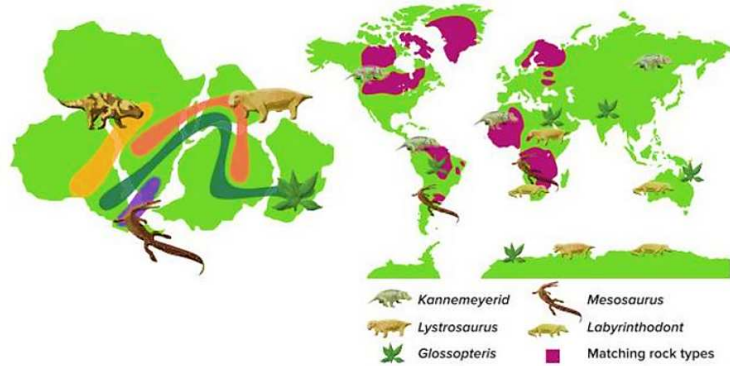

c.

Impact fracture

d.

Impact canyon

Alfred Wegener found different types of evidence to help support his hypothesis, studying the map below, Which of the following statements describe how the presence of Mesosaurus fossils in South America and Africa helps support his hypothesis?

**Learning Outcomes Covered**

- SCI.2.3.05.005

a.

A reptile would not have been able to swim across an entire ocean, so the landmasses must have been closer together

b.

It shows that the climates of both continents were different during the time that Mesosaurus lived

c.

This suggests that all continents moved apart, except India and Antarctica remained stationary

d.

It shows that Mesosaurus could only exist on South America and Africa because all the other continents were covered in ice
