**Then and Now**

I love my neighbourhood. I **1** (had / have / having) lived here for more than 30 years. It has changed a lot! In the early nineties, we **2** (didn't have / used to have / would have had) the roads we have today. In my **3** (opinion / point / advice), it was much better because there were fewer cars on the road. Before, we had some small hotels and shops, **4** (like / but / also) today, we have giant malls and very tall buildings. The changes are magnificent. I know it **5** (where / was / will) look even more different in another thirty more years. I will be excited to see it.

My Happy Place

From my point of view, living in a city is the best way to live. There is so much to see and do, compared to living in a small village.

I used to live in a tiny village near the sea. It was a beautiful place, with very friendly neighbours. However, I wasn't happy there because it was too quiet for me. I spent a lot of time alone when I lived there. Most of the young people in my village had different interests to me. They loved playing computer games but I was always cooking tasty meals at home. I love food, but I was unhappy because my village only had two places to eat out.

I don't drive so getting around is much easier for me here. I use the metro to get to work. However, in my village I used to walk to work, which was difficult in hot weather. I also live near a bus station which has many bus routes, making it easy for me to explore the city. There are a range of cycle tracks too if you wish to travel to your workplace and get fit at the same time.

What I love the most about Dubai is the variety of restaurants, with different foods from all over the world. At the weekend, I can shop at the malls, explore art and history museums, or catch the latest movie at any of the giant cinemas. It's easy to make friends here when you go out. Everyone is so nice. It certainly is my happy place.

A Neighbourhood Project

Salama looked unhappily out of her window at the grey, crowded street. Sad-looking people walked quickly past the tall, ugly apartment buildings as they made their way to their jobs. With their heads down, they didn't stop to talk to each other, or even look around themselves. Cars and buses raced along the roads, black smoke coming from their engines.

"Father," she said, "I've been looking at the street for a while. There are only buildings, roads and pavements here. There are no flowers and trees, or spaces for people to sit and relax. I'd like to create a garden for people to use when they have free time."

The following day, Salama started to prepare her plan. She looked at other projects that were designed to introduce more plants and gardens into city neighbourhoods. She met with people who could design gardens and would help her to create her own green community space.

These days, the street looks very different. The pavements are planted with lovely, coloured flowers. At the end of the road are gardens with long, green grass and tall trees. There's a small, blue lake. Without a doubt though, the main thing the garden has changed is the way that people live. The gardens are visited daily by people from all over the neighbourhood who meet with friends and family there. They take time to enjoy the beautiful surroundings together.

Salama's father was proud of her achievement. "Everyone looks so much happier now," he said. "I believe that others should copy your green project for their neighbourhoods as

4.

a. has already been

b. is just been

c. to be already

Years Gone By

I've just visited a gallery I wanted to go to for a long time. It is near an old fish market which closed before I saw it. The gallery is showing an exhibition of photographs taken many decades ago. There are photographs of the market, and of a range of old shops from the area. It gives us insight into the community in those days, through images of how people shopped and relaxed.

When I visited, I saw that there were so many photos to see - in different sections to show the different old parts of the city. I didn't have much time to look through the pictures of cafes and restaurants. However, while I was looking at the photos in the third section, I stopped at the picture of an old bakery. I studied the old way of delivering bread by bike. The boy delivering bread must have been feeling tired in this picture. I could see this, but also that he was carrying on. The look of effort, and hard work really made me proud of him.

The age of frozen foods and supermarket shopping may be more convenient, but I feel a real sense of community looking at these old photos. Some people might find it too old-fashioned but I think it would be a happy place to live in. I feel like they show something that is lost in an age of online shopping.
