Part 4: Free-response Question – Inference

"In the year 2040, artificial intelligence has advanced to the point where it can manage entire companies. Many argue that this will result in widespread unemployment, as robots and AI take over jobs that humans currently do. However, others believe that AI will create new industries, allowing people to work in fields that don't exist yet. The key to adapting to this new world lies in how well workers can retrain and adapt to new technologies."

Question:

What is the main idea of the text?

Justification:

Why do you think that the author believes retraining is important for future workers?

Part 5: MAZE

Instructions: Read the following text and fill in the gaps with the correct word (a, b, or c).

Text:

"In today's world, many companies (1) _____ about the future of work. They (2) _____ that automation and AI will change the way businesses operate. However, experts (3) _____ that this change will be gradual and that there (4) _____ enough time for people to adjust."

1. a) think
   b) are thinking
   c) thinking

2. a) believes
   b) believe
   c) are believing

3. a) predicted
   b) predict
   c) have predicted

4. a) is
   b) was
   c) will be

===

Part 6: MAZE -2

Instructions: Fill in the gaps with the correct word (a, b, or c).

"AI has the potential to improve our lives in many ways. It (1) _____ to diagnose diseases quickly and accurately. However, some argue that if AI (2) _____ too much control, it could negatively impact human workers. It (3) _____ that AI will become more integrated into daily life, but it (4) _____ be essential for humans to maintain control over critical decisions."

1. a) has been used
   b) is used
   c) will be used

2. a) takes
   b) take
   c) took

3. a) has been said
   b) is said
   c) will be said

4. a) will
   b) would
   c) is

Part 7: Reading Comprehension

"Robots are changing the way industries function. In factories, robots are used to assemble products faster than humans can. In offices, artificial intelligence (AI) is used to assist with customer service, scheduling, and data analysis. While there is some fear about robots taking jobs, many experts believe that robots and AI will create more job opportunities in fields like technology and engineering."

Questions:

1. What are robots used for in factories?
   a) Cleaning
   b) Assembling products
   c) Scheduling

2. How is AI used in offices?
   a) For research
   b) For customer service, scheduling, and data analysis
   c) For designing products

3. What is the fear some people have about robots?
   a) That they will create new industries
   b) That they will take jobs from humans
   c) That they will malfunction

===
Part 8: Reading Comprehension

Text (Reading):
"As artificial intelligence continues to evolve, many experts have suggested that workers must adapt or risk being left behind. A growing number of industries are already implementing AI tools, and in some cases, workers have been retrained to operate alongside AI systems. While these advancements may reduce certain jobs, they can also lead to new opportunities for skilled workers."

Questions:

1. What is suggested about the future of work with AI?
   a) Workers will lose all jobs.
   b) Workers need to adapt to changes in the workplace.
   c) AI will create no new opportunities.

2. What is one solution to the potential negative impact of AI on jobs?
   a) Stop using AI altogether.
   b) Retrain workers to work with AI.
   c) Remove AI from industries.

Part 9: Reading Comprehension

"AI's impact on industries has been enormous. From manufacturing to healthcare, AI is used to improve productivity and create new methods of problem-solving. In healthcare, AI systems assist doctors in diagnosing illnesses with greater accuracy. Meanwhile, in the tech sector, companies use AI to develop innovative products and services, ranging from smart devices to virtual assistants. As AI continues to grow, its presence in both the public and private sectors will likely increase."

Questions:

1. In which sector is AI helping doctors?
   a) Education
   b) Healthcare
   c) Manufacturing

2. How is AI used in the tech sector?
   a) To manage resources
   b) To create innovative products and services
   c) To improve productivity in offices

3. What is the expected future impact of AI?
   a) AI will remain stagnant.
   b) AI's presence in both public and private sectors will increase.
   c) AI will be replaced by human workers.

===

Part 10: Reading Comprehension

Text (Reading):
"The future of work will undoubtedly be shaped by artificial intelligence. While some workers may fear job displacement, the truth is that many roles will change rather than disappear. As technology advances, new jobs will be created in sectors that we haven't yet imagined. It is clear that workers who are able to adapt and develop new skills will thrive in this evolving environment."

Questions:

1. What is the overall message of the text?
    a) AI will take over all jobs.
    b) The future job market will offer new opportunities for those who adapt.
    c) AI will not change the job market.

MODEL ANSWERS

Part 1: Writing Task – Opinion Response

Model Answer:
Artificial intelligence improves efficiency in the workplace but also poses a threat to job security in some sectors.

Part 2: Writing Task – Plan for an Essay

Model Answer:

- **Introduction:**
  AI and robotics are transforming industries, presenting both challenges and opportunities.

- **Body:**

  o   AI and robotics improve productivity but may replace manual jobs.

  o   Intellectual jobs require adaptation and new skills to work with AI.

  o   Technology sector job growth due to demand for AI and robotics expertise.

- **Conclusion:**
  Despite the challenges, new job opportunities will arise in emerging fields with proper retraining.

==

Part 3: Writing Task – Extended Response

Model Answer:
Advancements in AI and robotics have positive and negative effects on job opportunities. While automation may replace routine jobs in manufacturing, it creates new roles in technology. Intellectual jobs, such as in healthcare, may require new skills to collaborate with AI. Over time, emerging fields in AI and robotics will offer new opportunities, but workers must continually adapt.

Part 4: Free-response Question – Inference

Model Answer (Main Idea):
AI will both displace jobs and create new opportunities, depending on how workers adapt and retrain.

Justification:
The author stresses the importance of retraining workers to stay relevant in industries affected by AI advancements.
