	galaxy	مجرة

The field of _____ is constantly evolving with new advancements.

a) technology

b) jobs

c) variety

d) routine

2. Many _____ are now working from home, which has changed workplace dynamics.

a) robots

b) employees

c) features

d) rockets

3. In the future, _____ will play a significant role in decision-making.

a) artificial intelligence

b) variety

c) satellite

d) lifestyle

4. The company has _____ its operations to new markets across the globe.

a) expanded

b) successful

c) realistic

d) robotics

5. _____ is an essential skill for predicting market trends in the business world.

a) Predicting

b) Features

c) Software

d) Experience

6. With the rise of _____ technologies, many traditional jobs are changing.

a) advanced

b) robotics

c) artificial intelligence

d) variety

7. The _____ of artificial intelligence is helping improve industries like healthcare and finance.

a) routine

b) demand

c) features

d) success

8. His _____ was built on years of dedication and hard work.

a) failure

b) success

c) demand

d) variety

9. Many people are now interested in _____ because it offers an immersive experience.

a) virtual reality

b) lifestyle

c) prediction

d) technology

10. The rocket launched successfully and traveled to a new _____ in space.

a) satellite

b) galaxy

c) workplace

d) routine

11. The _____ of the company has led to rapid growth and expansion.

a) success

b) robotics

c) experience

d) technology

12. The _____ of social media has created new ways for businesses to interact with customers.

a) routine

b) software

c) demand

d) variety

13. The _____ was filled with astronauts preparing for their mission to the moon.

a) satellite

b) rocket

c) workplace

d) galaxy

14. Advances in _____ allow for more realistic video games and simulations.

a) software

b) virtual reality

c) artificial intelligence

d) robotics

15. The scientist's _____ was based on years of observation and research.

a) experience

b) prediction

c) routine

d) variety

16. _____ habits can greatly influence a person's overall health and well-being.

a) Routine

b) Robotics

c) Software

d) Jobs

Answer Key:

1. a) technology

2. b) employees

3. a) artificial intelligence

4. a) expanded

5. a) predicting

6. c) artificial intelligence

7. c) features

8. b) success

9. a) virtual reality

10. b) galaxy

11. a) success

12. c) demand

13. b) rocket

14. b) virtual reality

15. b) prediction

16. a) routine

القواعد المطلوبة

Topic(s): Business, jobs, science.			
ECFE Grammar	**Prerequisite**	**GSE Grammar**	**Functional Language**
Passive: future simple passive	Can use the present simplepassive. (48)	Can use 'going' to and 'will' future forms ofthe passive. (50)	Describing past experiences andevents
Adjectives: superlatives	Can form the superlative of regular adjectives with '-est'. (36)	Can use 'one of/some of/among' in phrases with superlative adjectives. (55)	Expressing opinion
Reported speech: reporting verbs	Can make affirmative statementsusing common regular past simple forms. (30)	Can make tense changes (present topast) in reported speech. (56)	Comparing and
Past time: past perfect	Can use the present perfect to refer to personal experiences inthe past. (41)	Can use the past perfect in a range ofcommon situations. (54)	contrasting
Future time: future perfect	Can use the present perfect to refer to personal experiences inthe past. (41)	Can use the future perfect with referenceto actions to be completed by a specific time in the future. (66)	
Modals: present modals (likelihood)	Can use 'can' to refer to ability inthe present. (29)	Can use a range of modals to expresslikelihood (may, might, could, should).	

The new product _____ (will be launched / will launch) by the company next month.

2. This is the _____ (most expensive / better) job I've ever had.

3. She said that she _____ (has finished / had finished) the project.

4. By next year, I _____ (will have completed / will complete) my degree.

5. She _____ (may / can) finish the report tomorrow if she works quickly.

6. The new policy _____ (will be announced / will announce) next week.

7. By the time I arrived, the meeting _____ (had started / started).

8. This job is one of the _____ (best / better) jobs I've had.

9. The report _____ (will be written / will write) by the team tomorrow.

10. You _____ (should / can) improve your skills for this job.

Answer Key:

1. will be launched

2. most expensive

3. had finished

4. will have completed

5. may

6. will be announced

7. had started

8. best

9. will be written

10.should

Exam Specifications مواصفات الاختبار

Plan Question   (5 marks)

Students are asked to produce aplan to answer an essay prompt.

Students are asked to create **a plan** for their essay. Plans can vary . For example, it can be "the main

points in the introduction, body, and conclusion of the essay or a mind map المخطط

ممكن تضع نقاط بسيطة في المقدمة والعرض الأول والعرض الثاني ويجب الإجابة عن الأسئلة الثلاثة باختصار والاشارة لما سوف تقوم بالكتابة عنه

SAMPLES

Write a plan about:

 Plan an essay on the following topic:

"*How can advancements in artificial intelligence and*

technology affect the future of business and jobs?

مقدمة Introduction

تعريف الموضوع بشكل جيد ثم إعطاء امثلة توضيحية /باختصار شديد المقارنة بين الماضي والحاضر ثم تلخيص الفكرة //لا يشترط جمل بل أفكار

العرض Bod

Guidelines for Planning:

- **Plan your response before writing**. Consider the following:

  - **Introduction**: What is your main argument or thesis statement?

  - **Body Paragraphs**: How will you organize your ideas? Think about the key points you want to discuss.

    - What are the positive impacts of AI and technology on businesses and jobs?

    - What are the possible negative consequences or challenges?

  - **Conclusion**: Summarize your key points and restate your opinion.

التحدث عن الإيجابيات ان طلبت واجابة الأسئلة خصوصا الموجودة في السؤال لا يشترط جمل

Conclusion الخاتمة

تلخيص الموضوع والاجابة عن السؤال الثالث ثم إعطاء الراي باختصار على شكل نقاط

20

- ***Be sure to include***:

  - ***Topic sentences*** *for each paragraph.*

  - ***Supporting details*** *and examples to justify your opinion.*

Introduction:

- **Thesis statement: Advancements in artificial intelligence (AI) and technology are expected to revolutionize the future of business and jobs, offering both benefits and challenges.**

Body Paragraph 1:

- **Topic sentence: One major benefit of AI and technology is the increased efficiency and productivity in businesses.**

- **Supporting details:**

  - **Automation of repetitive tasks will free up time for employees to focus on creative and strategic roles.**

  - **Examples: AI-powered customer service tools and inventory management systems.**

- o Impact on business success: Increased profits, faster decision-making processes.

Body Paragraph 2:

- **Topic sentence: However, there are also challenges and potential negative consequences that come with these advancements.**

- **Supporting details:**

  - o **Job displacement: Automation may lead to job losses, especially in industries that rely on routine tasks.**

  - o **Examples: Manufacturing jobs being replaced by robots, data entry jobs being automated.**

  - o **Solutions: Companies can invest in employee retraining programs and help workers transition to new roles.**

Conclusion:

- **Summary: AI and technology offer significant benefits to businesses, such as increased efficiency and new job opportunities. However, the negative effects, including job displacement, should be addressed through proper planning and retraining efforts.**

مهمة الكتابة الرئيسة: (25درجة)

يقوم الطلبة باستخدام المخطط الذي أنشأوه لكتابة فقرة عن نفس الموضوع في المخطط فيما لا يقل عن 50 كلمة.

مقدمة Introduction

</div>

- **Restate thesis: Ultimately, AI and technology have the potential to improve business outcomes, but their challenges must be managed to ensure a positive future for both industries and workers.**

Main Writing Task: (25 marks)

Students are asked to produce anextended text in response to a prompt and three bullet points

Students are asked to use the plan they have created to write at least 120-word essay about the same topic in the plan.

Write 100 -word essay on the following topic:

"How do advancements in artificial intelligence (AI) and technology impact the future of business and jobs?

Respond to the following points in your answer:

1.The potential benefits of AI and technology for businesses.

تعريف الموضوع بشكل جيد ثم إعطاء امثلة توضيحية المقارنة بين الماضي والحاضر ثم تلخيص الفكرة
العرض الأول Body1   **التحدث عن الإيجابيات ان طلبت واجابة الأسئلة خصوصا السؤال الأول**
العرض الثاني Body 2   **التحدث عن السلبيات ان طلبت والاجابة عن السؤال الثاني**
الخاتمة Conclusion   **تلخيص الموضوع والاجابة عن السؤال الثالث ثم إعطاء الراي**

يجب البدأ بحرف كبير ووضع نقطة نهاية الجمل والاهتمام بعلامات الترقيم والاملاء والاجابة على الأسئلة والنقاط المطلوبة في كل جزء من أجزاء موضوع الانشاء او المقال

سؤال الاستنتاج (درجتان)

2. The possible negative effects of AI on the job market.

3. Solutions for mitigating the challenges AI may present to workers.

How do advancements in artificial intelligence (AI) and technology impact the future of business and jobs?

Response:

Advancements in artificial intelligence (AI) and technology are reshaping the future of business and jobs. On the positive side, businesses stand to gain significant benefits from AI, including improved efficiency and productivity. Automation of routine tasks allows employees to focus on more creative and strategic aspects of their work. For example, AI-

يعطى الطلبة نص طويل نوعا ما على شكل قصة مثلا ويطلب من الطالب معرفة نهاية القصة او ماذا سوف يحدث لبطل القصة او ما المتوقع من حدث ما وسؤال الاستنتاج يعتمد على الفهم العام للقصة ومعرفة الفكرة الرئيسة وتوقع الإجابة على ضوء القصة مع الاهتمام ببعض التفاصيل الموجودة في النص ومحاولة الربط بينها وبين المطلوب

I think that --------------------------

because --------------------------------

-------------------------------- يشبه سؤال

إعطاء الراي

24

powered software can streamline customer service and inventory management, ultimately leading to cost savings and increased profits.

However, these technological advancements can also have negative effects on the job market. Many workers in routine or manual jobs may face unemployment as AI takes over tasks once performed by humans. Jobs in industries like manufacturing and retail may be particularly vulnerable. To address this challenge, businesses and governments must invest in retraining programs to help workers transition to new roles, particularly in tech-related fields.

In conclusion, while AI and technology offer considerable advantages for business efficiency, it is

سؤال التبرير (3 درجات)

يطلب من الطلاب تبرير اجابتهم على سؤال الاستنتاج السابق مدعمين اجاباتهم بمعلومات موجودة داخل النص.مثلا لماذا اجابتك هي افضل إجابة

My answer is the best because ------------------

--------------as it is mentioned in

important to balance progress with a focus on job creation and workforce development to ensure that workers are not left behind.

Question 1: Inference (2 Marks)

Read the following text and answer the questions below. Use full sentences.

Text:

The Future of Work: The Impact of Artificial Intelligence on Jobs

Artificial intelligence (AI) has been transforming industries at an unprecedented rate, and its impact on the future of work is both exciting and concerning. In the workplace, AI has already shown its potential to automate mundane tasks and increase efficiency. For example, AI can quickly analyze data and generate reports, allowing employees to focus on more strategic and creative tasks.

paragraph (   ) line(   ) I quote some evidence that support my answer"_____

_____

_____."

اجابتي افضل إجابة لأنه--------

----------------كما هو مذكور

في الفقرة -----السطر -------

واقتبس الدليل التالي من النص

"-----------------------"

As a result, businesses can increase productivity and innovation, which may lead to a more competitive global economy.

However, there are significant challenges. The widespread adoption of AI could result in job displacement, especially in sectors that rely heavily on routine, manual labor. According to a recent study, automation could eliminate millions of jobs in the next few decades, particularly in industries like manufacturing and retail. While some argue that AI will create new jobs, these may require skills that many workers do not currently possess.

To address these issues, experts suggest that workers will need to adapt by acquiring new skills, especially those related to technology. Companies and governments are urged to provide retraining opportunities and promote lifelong learning to help workers transition into new roles. The future of work will require

collaboration between businesses, policymakers, and employees to ensure that technological progress benefits everyone.

Free-Response Question:

1. In your opinion, what is the primary concern regarding AI's impact on the future of work as discussed in the text?

Model Answers

Question 1 (Inference):

The main challenge faced by the villagers is the destruction of their forest by the logging company.

Question 2: Justification (3 Marks)

2. Justify your answer to the previous question using evidence from the text.

This is the main challenge because the text mentions that the villagers "relied on the trees for food, shelter, and income." It also states that "large trucks arrived, and workers began cutting down the trees at an alarming rate," which caused the villagers to worry about losing everything. Their decision to write a letter and contact environmental organizations further shows how serious this problem is to them.

I think that --------------------------**because** -------------------

----

My answer is the best because ---------------------------------

---**as it is**

mentioned in paragraph ( ) line( ) I quote some evidence that support my **1. Inference Answer (2 marks):** **The primary concern regarding AI's impact on the future of work is the potential for job displacement, especially in sectors that rely on routine, manual labor.** **2. Justification (3 marks):** **The text highlights the concern that AI will eliminate millions of jobs, particularly in industries like manufacturing and retail. It states, "Automation could eliminate millions of jobs in the next few decades, particularly in industries like manufacturing and retail." This clearly shows that job loss due to AI automation is a significant worry.**

Text:

The rapid advancement of technology is _____ the way businesses operate. In the future, many jobs _____ replaced by machines, but new opportunities will also _____ created. For example, industries like robotics and artificial intelligence _____ expected to offer more positions. However, some jobs _____ lost, especially in traditional sectors like manufacturing. Workers will need to _____ by learning new skills in order to thrive in this changing landscape.

MAZE Task:

Fill in the blanks with the correct word:

1. **The rapid advancement of technology is _____ the way businesses operate.**
   a) changing
   b) changed
   c) change

2. **In the future, many jobs _____ replaced by machines.**

   a) will be

   b) are

   c) were

3. **New opportunities will also _____ created.**

   a) be

   b) being

   c) are

4. **Industries like robotics and artificial intelligence _____ expected to offer more positions.**

   a) are

   b) were

   c) will

5. **However, some jobs _____ lost, especially in traditional sectors like manufacturing.**

   a) will be

   b) are

   c) had

6. Workers will need to _____ by learning new skills.

a) adapt

b) adapting

c) adapts

Example Answers:

1. **changing**

2. **will be**

3. **be**

4. **are**

5. **will be**

6. **adapt**

text that test students' awareness of at-level grammar and sentence phrasing.**

- Students will be asked to answer 9 multiple choice questions assessing students' understanding of the covered grammar in the exam in a short paragraph.

مثال SAMPLE

The Future of Robotics in Business

Robotics is rapidly _____ the way industries operate. In recent years, robots have become an _____ part of many businesses, particularly in manufacturing. They are used to _____ tasks that are repetitive and require high precision, such as assembling parts and packaging products. As technology continues to improve, robots are _____ to take on even more complex roles, such as assisting in medical surgeries and helping elderly people in their homes.

The impact of robotics on the job market has sparked concerns. While many believe that robots will create new jobs, others argue that automation will lead to job _____, especially in manual labor sectors. To address these concerns, companies are focusing on developing human-robot _____, where robots work alongside humans to improve efficiency and reduce physical strain.

In the future, robots will not only enhance productivity but also help businesses to thrive in a competitive global economy. However, it will be crucial for governments and companies to work together to _____ the potential challenges posed by automation.

MAZE Task:

Fill in the blanks with the correct word:

1. Robotics is rapidly _____ the way industries operate.

   a) changing

   b) change

   c) changed

2. Robots have become an _____ part of many businesses.

   a) optional

   b) unimportant

   c) essential

3. They are used to _____ tasks that are repetitive and require high precision.

   a) ignore

   b) assist

   c) perform

4. Robots are _____ to take on even more complex roles.

   a) are expected

   b) will expect

   c) expected

5. Job _____ refers to the loss of employment opportunities.

   a) creation

b) loss

c) opportunities

6. Human-robot _____ suggests that humans and robots will work together.

   a) isolation

   b) separation

   c) collaboration

7. Governments and companies will need to _____ the potential challenges posed by automation.

   a) ignore

   b) complicate

   c) manage

8. Robots are expected to help businesses _____ by improving productivity.

   a) decrease

   b) struggle

   c) thrive

Example Answers:

1. **changing**

2. **essential**

3. **perform**

4. **are expected**

5. **loss**

6. **collaboration**

7. **manage**

8. **thrive**

37

efficiency and productivity. AI systems can analyze large amounts of data quickly, which helps businesses make informed decisions. For example, in retail, AI is used to predict customer preferences and stock products accordingly. In healthcare, AI systems help doctors diagnose diseases by analyzing medical images.

AI is also playing a crucial role in customer service. Many companies are using AI-powered chatbots to assist customers. These chatbots can answer common questions, provide product recommendations, and even process orders, all without human intervention. This not only improves the customer experience but also reduces operational costs.

However, there are concerns about the impact of AI on jobs. While AI can automate many tasks, some fear it will replace

human workers, especially in industries like manufacturing and customer service. As AI technology continues to develop, businesses will need to balance automation with human involvement to ensure the well-being of workers. Despite these concerns, the potential benefits of AI in business are enormous. It can help companies operate more efficiently, improve products and services, and create new business opportunities.	
MAZE Task: **Read the text and answer the following questions. Choose the correct answer: a, b, or c.**	
1. What is one way AI is used in retail?	

a) To predict customer preferences and adjust stock accordingly. b) To train employees in customer service. c) To replace human workers in the warehouse.	
2. How do AI systems help doctors in healthcare? a) They manage hospital staff schedules. b) They analyze medical images to help diagnose diseases. c) They create patient marketing strategies.	
3. What role do AI-powered chatbots play in customer service? a) They replace human employees entirely. b) They help customers by answering common questions and	

processing orders.

c) They design new products for businesses.

4. What is a concern regarding the impact of AI on jobs?

a) AI might make products more expensive.

b) AI might replace human workers, especially in certain

industries.

c) AI could increase the cost of healthcare.

5. What is the overall message of the text regarding AI in

business?

a) AI will replace all human workers.

b) AI can help businesses operate more efficiently and create

The Rise of Remote Work: A New Era

The COVID-19 pandemic changed the way we work, with millions of employees shifting to remote work virtually overnight. What was initially seen as a temporary solution has now become a permanent fixture in many industries. The advantages of remote work, such as greater flexibility, no daily commute,

and the ability to work from anywhere, have

made it increasingly popular among both

employees and employers.

However, remote work also presents

challenges. Many workers struggle with

isolation, lack of face-to-face interaction, and

difficulties in separating work life from

personal life. For employers, managing remote

teams requires new skills, such as effective

communication and providing the right tools and support to maintain productivity.

Despite these challenges, the trend of remote work continues to grow. Many companies are now offering hybrid models, where employees can split their time between working remotely and working in the office. As a result, remote work is likely to remain a significant part of the workforce landscape even after the pandemic has ended.

Overall, remote work has revolutionized the workplace. While it brings new challenges, it also offers opportunities for more flexibility, better work-life balance, and a wider talent pool for employers. As both employees and companies adjust to this new era, the future of work looks very different from the past.

MAZE Task:

Read the text and answer the following questions. Choose the correct answer: a, b, or c.

1. According to the text, what was one advantage of remote work during the pandemic?

a) It helped workers spend more time commuting.

b) It offered greater flexibility and eliminated

the need for commuting.

c) It made face-to-face interactions more common.

2. What is a challenge mentioned in the text regarding remote work?

a) Workers feel more isolated and have difficulty separating work and personal life.

b) Employers find it easy to manage remote

teams.

c) The workday is shorter for remote workers.

3. What is the overall tone of the text?

a) Optimistic and positive about the future of

remote work.

b) Critical and negative about the changes in

the workplace.

c) Indifferent about the trend of remote work.

Rubric for Assessment:			
Criteria	A: Foundational Proficiency (1 mark per question)	B: Grade-level Mastery (3 marks for all)	
Understanding overall meaning and tone	The student can identify key information	The student demonstrates a clear understanding	

and ideas but may miss subtle tones or connections.	of the text's meaning, tone, and implications.	
Example Answers: 1. **b) It offered greater flexibility and eliminated the need for commuting.**		

2. **a) Workers feel more isolated and have difficulty separating work and personal life.**

3. **a) Optimistic and positive about the future of remote work.**

يقوم الطلبة بقراءة نص طويل والاجابة على 6 أسئلة اختيار من متعدد تكون بمستوى الصف وتكون الإجابات مباشرة وغير مباشرة لذا يجب التركيز

6 questions Multiple-choice reading comprehension questions that demonstrate application of reading skills.

Answers explicitly and implicitly stated.

Students are asked to read a simple text and answer 7 multiple choice questions:
A,B,C

The ocean is a vast and diverse ecosystem that covers more than 70% of the Earth's surface. It is home to millions of species of animals, including fish, mammals, and invertebrates. The ocean provides food, oxygen, and regulates the Earth's climate. However, it is facing many challenges due to human activities.

One of the most significant threats to the ocean is pollution. Every year, millions of tons of plastic waste end up in the ocean, harming marine life and ecosystems. Many animals mistake plastic for food, which can lead to injury or death. In addition, pollution affects the quality of water, making it dangerous for humans and animals alike.

Another challenge is overfishing. The demand for fish and seafood has led to overfishing in many areas, which depletes fish

populations and damages marine habitats. This has long-term effects on the food chain and the survival of many marine species. To protect the ocean, it is important to reduce pollution, promote sustainable fishing practices, and raise awareness about the importance of preserving marine environments. By taking action now, we can help protect the ocean and its inhabitants for future generations.

Questions

1. What is one major threat to the ocean mentioned in the text?

   a) Climate change

   b) Pollution

   c) Coral reefs

2. How does plastic pollution affect marine life?

   a) It provides food for marine animals.

b) Animals mistake it for food, leading to harm.

c) It improves water quality.

3. What is the consequence of overfishing mentioned in the text?

a) Fish populations are growing.

b) Marine habitats are being damaged.

c) The ocean is becoming cleaner.

4. What is one solution to protect the ocean?

a) Increase fishing efforts.

b) Raise awareness about preserving marine environments.

c) Ignore the effects of pollution.

5. Why is the ocean important to life on Earth?

a) It covers most of the Earth's surface and provides food,

oxygen, and climate regulation.

b) It is a source of freshwater for drinking.

c) It is only important for recreational activities.

6. What role does the ocean play in regulating the Earth's climate?

a) It increases the temperature of the Earth.

b) It absorbs carbon dioxide and produces oxygen.

c) It causes floods and storms.

7. What happens to fish populations due to overfishing?

a) They increase in number.

b) They become extinct in some areas.

c) They migrate to other oceans.

8. What can be done to reduce the damage caused by overfishing?

a) Promote sustainable fishing practices.

b) Increase fish consumption.

c) Reduce the size of fishing boats.

Model Answers

1. b) Pollution

2. b) Animals mistake it for food, leading to harm.

3. b) Marine habitats are being damaged.

4. b) Raise awareness about preserving marine environments.

5. a) It covers most of the Earth's surface and provides food, oxygen, and climate regulation.

6. b) It absorbs carbon dioxide and produces oxygen.

7. b) They become extinct in some areas.

8. a) Promote sustainable fishing practices.

يقوم الطلبة بقراءة نص طويل والاجابة على 3 أسئلة اختيار من متعدد تكون بمستوى الصف وتكون الإجابات وغير مباشرة وتحتاج لتحليل وتفكير خارج الصندوق والربط والاستنتاج للوصول للإجابات لذا يجب التركيز

3 questions Multiple-choice reading comprehension questions that demonstrate application of reading skills.

Answers implicitly stated.

SAMPLEمثال

The Evolution of Renewable Energy: A Look Into the Future

Renewable energy has become one of the most important solutions to combating climate change. Over the last few decades, there has been a significant shift towards cleaner energy sources such as wind, solar, and hydropower. These energy sources are not only environmentally friendly but also

sustainable, as they are not dependent on finite resources like fossil fuels.

Solar energy, in particular, has seen rapid advancements. Solar panels have become more efficient, and the cost of installation has dropped significantly, making it a more affordable option for both businesses and homeowners. Wind energy is also growing, with more wind farms being constructed in both onshore and offshore locations. The rise of wind turbines has made it possible to harness the power of the wind in many regions that were previously unsuitable for traditional energy production.

Despite these advancements, challenges remain. One major issue is the storage of renewable energy. Solar and wind energy are intermittent, meaning that they are not always available when needed. As a result, energy storage technologies are

crucial to ensuring a steady supply of power. Battery technology is advancing, but it is still expensive and not yet capable of storing energy on a large scale.

In addition, while renewable energy is growing rapidly, the transition away from fossil fuels is not without its obstacles. Governments must invest in infrastructure, and there is still resistance from industries that rely on fossil fuels. However, as technology improves and the demand for clean energy grows, the future of renewable energy looks promising.

MAZE Task:

Read the text and answer the following questions. Choose the correct answer: a, b, or c.

1. What has been a significant shift in energy production in recent decades? a) Increased use of fossil fuels. b) Shift towards renewable energy sources. c) Reduced energy consumption worldwide.	
2. What has made solar energy more affordable? a) Solar panels becoming more efficient. b) The rise of fossil fuel prices. c) Increased government subsidies.	
3. Where are wind farms being built?	

a) Only on land in rural areas.	
b) Both onshore and offshore locations.	
c) Only offshore locations.	
4. What is a challenge faced by renewable energy sources like wind and solar? a) They are too expensive for consumers. b) They are not always available when needed. c) They require too much land to be built.	
5. What is the importance of energy storage technologies? a) To improve the efficiency of renewable energy sources. b) To ensure a constant supply of energy, even when solar or	

wind energy is unavailable.

c) To make fossil fuels more sustainable.

6. What is one obstacle to the transition from fossil fuels to renewable energy?

a) Governments have too much funding for renewable projects.

b) The growth of renewable energy has caused economic problems.

c) Resistance from industries that depend on fossil fuels.

7. What is the overall tone of the text?

a) Optimistic about the future of renewable energy.

b) Pessimistic about the future of renewable energy.

c) Neutral, simply stating facts about renewable energy.

1. What is one major role of the Amazon Rainforest?

   a) It regulates the Earth's temperature.

   b) It produces oxygen and absorbs carbon dioxide.

   c) It is the largest source of freshwater.

2. What is the main cause of deforestation in the Amazon?

   a) Natural disasters.
   b) Illegal logging, agriculture, and mining.

   c) Overpopulation.

3. How does climate change affect the Amazon Rainforest?

   a) It helps the forest grow.

   b) It increases the frequency of wildfires.

   c) It leads to more rainfall.

.

SAMPLES of QUESTIONS

Part 1: Reading Comprehension (Multiple-choice Questions)

Read the text and answer the following questions. Choose the correct answer: a, b, or c.

Text 1: The Future of Remote Work

In recent years, the world of work has seen a significant shift. The COVID-19 pandemic forced millions of workers to transition from office-based jobs to remote work. What initially seemed like a temporary measure quickly became a lasting trend. Many businesses realized that remote work could offer both advantages and challenges.

One of the main benefits of remote work is flexibility. Employees no longer have to commute, saving time and money. This flexibility allows workers to create their own schedules, which can lead to improved work-life balance. For example, people with young children or long commutes have been able to better manage their time, resulting in less stress.

On the other hand, there are challenges to working remotely. Some employees feel isolated, missing the social interaction that comes with working in an office. Additionally, remote work can blur the lines between personal and professional life, making it difficult to "switch off" after a long day. Companies also face difficulties in managing remote teams, especially when it comes to maintaining communication and ensuring productivity.

In the future, many companies are expected to adopt hybrid models, where employees split their time between working from home and in the office. This model may provide a balance that maximizes the benefits of both remote and office-based work.

---

1. What is one of the main benefits of remote work?

a) It allows employees to work from the office full-time.

b) It offers flexibility and eliminates commuting.

c) It decreases the productivity of employees.

---

2. What challenge do some employees face while working remotely?

a) They experience better social interaction.

b) They find it difficult to separate work from personal life.

c) They can manage their time more effectively.

---

3. What is the expected future of remote work according to the text?

a) All companies will return to full-time office work.

b) Remote work will be replaced by automation.

c) Many companies will adopt hybrid models of work.

Part 2: Inference Questions

Read the text and answer the questions. Provide full sentences in your responses.

Text 2: The Growth of Electric Vehicles

Electric vehicles (EVs) are rapidly changing the global transportation landscape. As concerns about climate change and pollution grow, more governments and businesses are investing in electric vehicles. EVs are powered by electricity rather than gasoline, which makes them a cleaner and more sustainable alternative to traditional cars.

The main environmental benefit of EVs is that they produce zero emissions, meaning they don't release harmful gases like carbon dioxide into the atmosphere. This is crucial for efforts to combat global warming. Additionally, the use of renewable energy sources, such as solar or wind power, to charge EVs further reduces their environmental impact.

However, there are still challenges to the widespread adoption of EVs. One significant barrier is the high initial cost. Although the prices of EVs are dropping, they are still more expensive than gasoline-powered cars. Another challenge is the limited range of some EVs. Although advancements in battery technology are helping to increase the driving range, many people still worry about being stranded without a charging station.

Despite these challenges, EVs are becoming more common on the roads. Governments are providing incentives for people to buy electric cars, and businesses are investing in charging infrastructure to make it easier for drivers to charge their vehicles on long trips. As technology improves, EVs are expected to become an integral part of the global transportation system.

---

4. What can be inferred about the environmental impact of electric vehicles?

---

5. What challenges do electric vehicles still face according to the text?

Part 3: Writing Task
Essay Prompt:
Do you think artificial intelligence (AI) will significantly impact the future of business and jobs? Explain why or why not, providing examples to support your answer.
- **Word Count**: 150-200 words
- **Use**: Simple and complex sentence structures, clear introduction, body, and conclusion.

Part 4: Vocabulary Matching
Match the words with their correct meanings.

Word	Meaning
Technology	a) The use of advanced systems or machines to do tasks efficiently.
Sustainability	b) The development and application of scientific knowledge to practical purposes.
Innovation	c) The ability to continue indefinitely without depleting resources.
Efficiency	d) The process of introducing new ideas or methods.

Part 5: Grammar Task
Fill in the blanks with the correct form of the verb in parentheses.

---

6. If we _____ (use) renewable energy, we would reduce our reliance on fossil fuels.
7. Many businesses _____ (invest) in AI technology in the past few years.

Model Answer:

Part 1: Reading Comprehension

1. **b) It offers flexibility and eliminates commuting.**
2. **b) They find it difficult to separate work from personal life.**
3. **c) Many companies will adopt hybrid models of work.**

Part 2: Inference Questions

4. **It can be inferred that electric vehicles (EVs) are seen as a sustainable solution to reducing emissions and combating climate change. Their use of renewable energy sources like solar or wind power further reduces their environmental impact.**
5. **Electric vehicles still face challenges such as their high initial cost, which makes them less accessible for some people, and their limited driving range. Despite advancements in battery technology, these challenges remain barriers to widespread adoption.**

Part 3: Writing Task

(Note: Sample response should meet the given requirements.)

Artificial intelligence (AI) is likely to have a significant impact on business and jobs in the future. On one hand, AI can improve efficiency by automating repetitive tasks, reducing costs, and enhancing productivity. For example, AI is already being used in industries like healthcare for diagnosing diseases and in customer service for handling inquiries. However, there are concerns about job displacement as machines take over roles traditionally held by humans. While AI will certainly transform industries, it also presents opportunities for new jobs, such as in AI development, data analysis, and robotics. In conclusion, although AI may change the landscape of work, it will also create new opportunities for those who can adapt to the technological advancements.

Part 4: Vocabulary Matching

- **Technology** -   a) The use of advanced systems or machines to do tasks efficiently.
- **Sustainability** -   c) The ability to continue indefinitely without depleting resources.
- **Innovation** -   d) The process of introducing new ideas or methods.
- **Efficiency** -   b) The development and application of scientific knowledge to practical purposes.

Part 1: MAZE Task (Grammar & Vocabulary)

Instructions: Fill in the blanks by selecting the correct answer.

Text:

Many animals rely on the _____ for survival. Without clean water and air, they can become endangered. The giraffe, for instance, has a long neck to reach the high leaves of trees. Giraffes typically live in _____ environments, such as the savannah. People have a responsibility to _____ animals in their natural habitats.

1. A) waste

   B) environment

   C) rubbish

2. A) urban

   B) wild

   C) domestic

3. A) protect

   B) hunt

   C) ignore

Part 2: MAZE Task (Grammar & Sentence Structure)

Instructions: Choose the correct answer to complete the sentences.

Text:

Many people have been working hard to ____ the oceans from pollution. One way we can contribute is by using less plastic. It's important to think of ways to reduce our ____ in daily activities.

4. A) solve

   B) recycle

   C) protect

5. A) energy

   B) waste

   C) effort

Part 3: Reading Comprehension (Below-Level Text)

Instructions: Read the passage below and answer the questions that follow.

Text:

There are many ways people can help the environment. One of the most

important things is to reduce the amount of plastic we use. Recycling plastic items, such as bottles and bags, helps reduce waste and protects wildlife. People can also plant trees, which help to clean the air and provide shelter for many animals.

6. Why is recycling important for the environment?

   A) It helps protect wildlife.

   B) It reduces the number of trees.

   C) It causes pollution.

7. How do trees help the environment?

   A) They provide food for animals.

   B) They clean the air and provide shelter.

   C) They help in hunting.

Part 4: Reading Comprehension

The Role of Electric Vehicles in the Future of Transportation

Electric vehicles (EVs) have gained significant attention in recent years as an alternative to traditional gasoline-powered cars. As concerns about climate change and air pollution increase, many governments and companies are turning to EVs as a solution to reduce greenhouse gas emissions. With advancements in technology, EVs are becoming more affordable, efficient, and accessible to the general public.

One of the key advantages of electric vehicles is that they produce zero emissions, unlike conventional vehicles that release carbon dioxide and other harmful pollutants into the air. This makes them a critical part of efforts to combat global warming and improve air quality in urban areas. In addition, the use of renewable energy sources, such as wind and solar power, to charge EVs can further reduce the environmental impact of transportation.

However, there are still challenges to widespread EV adoption. One major issue is the limited range of many electric vehicles. While the range of EVs has been steadily increasing, many models still cannot travel as far on a single charge as gasoline-powered cars can on a full tank. Additionally, the availability of

charging stations is still limited in many regions, which can make it difficult for drivers to charge their vehicles while on long trips.

Despite these challenges, the future of electric vehicles looks promising. Governments around the world are offering incentives and subsidies to encourage the adoption of EVs, and major car manufacturers are investing heavily in developing new models with longer ranges and faster charging times. As technology continues to improve, electric vehicles are expected to play a key role in reducing emissions and transforming the transportation industry.

MAZE Task:

Read the text and answer the following questions. Choose the correct answer: a, b, or c.

---

1. What is one key advantage of electric vehicles mentioned in the text?

a) They are more affordable than traditional cars.

b) They produce zero emissions, helping to improve air quality.

c) They are able to travel further than gasoline-powered cars.

---

2. What is one of the main challenges for electric vehicles?

a) Their affordability.

b) Their limited range and lack of charging stations.

c) The lack of government incentives.

---

3. What is the overall message of the text?

a) Electric vehicles are a promising solution for reducing emissions and improving air quality.

b) Electric vehicles will replace gasoline-powered cars entirely within the next few years.

c) Governments should stop investing in electric vehicles.

Rubric for Assessment:

Example Answers:

1. **b) They produce zero emissions, helping to improve air quality.**
2. **b) Their limited range and lack of charging stations.**

3. **a) Electric vehicles are a promising solution for reducing emissions and improving air quality.**

Part 6: Reading Comprehension (Narrative Text)

Instructions: Read the text and answer the questions below.

Text:

Anna had always loved animals. One day, while visiting the zoo, she noticed how unhappy some of the animals looked in their cages. She couldn't help but feel that something needed to change. She decided to start a campaign to raise awareness about animal rights and the need for better living conditions for zoo animals. Soon, she was joined by many others who shared her vision.

11. What inspired Anna to start her campaign?

A) The way animals were treated at the zoo.

B) A trip to the ocean.

C) A visit to a national park.

12. What did Anna do after noticing the animals' conditions?

A) She took a photo.

B) She started a campaign.

C) She spoke with the zookeepers.

Part 7: Vocabulary Comprehension

Instructions: Choose the correct definition of the word from the options provided.

13. *Recycle*

A) To throw away trash

B) To use something again

C) To break something into pieces

14. *Endangered*

A) Safe and secure

B) At risk of disappearing

C) Easily found everywhere

Part 1: Reading Comprehension (Multiple-choice Questions)

Read the text and answer the following questions. Choose the correct answer: a, b, or c.

Text 1: The Future of Remote Work

The COVID-19 pandemic forced millions of employees to switch to remote work. What began as a necessity became a popular and long-term trend. Many businesses have found that employees can be just as productive, if not more, when working from home. The benefits of remote work include flexible working hours, no commuting, and the ability to work from anywhere.

However, there are challenges. Some workers feel isolated, and maintaining a work-life balance can be difficult when the office is in your living room. Companies must also adapt to new ways of managing remote teams, focusing on clear communication, and ensuring employees stay connected.

Despite the challenges, remote work is here to stay. Many companies are now adopting hybrid models where employees can split their time between working remotely and in the office.

---

1. What is the main benefit of remote work mentioned in the text?

a) It eliminates the need for employees to work at home.

b) It allows employees to work in the office full-time.

c) It offers flexibility, eliminates commuting, and allows work from anywhere.

---

2. What is a challenge of remote work mentioned in the text?

a) Employees are more productive when working remotely.

b) Workers feel isolated and struggle with work-life balance.

c) Remote work eliminates the need for communication.

---

3. What is the future of remote work according to the text?

a) Remote work will no longer be used in the future.

b) More companies will return to full-time office work.

c) Remote work is expected to stay, with hybrid models being common.

Part 2: Inference Questions

Read the text and answer the questions. Provide full sentences in your responses.

Text 2: The Rise of Electric Vehicles

Electric vehicles (EVs) are becoming increasingly popular as an alternative to gasoline-powered cars. As the world shifts towards cleaner energy solutions, EVs are seen as a key part of reducing carbon emissions. Many governments are offering incentives to consumers who buy electric cars, making them more affordable.

However, EVs face challenges such as limited driving range and the need for more charging stations. Despite these challenges, companies are investing heavily in research and development to improve battery life and expand charging infrastructure.

The growing demand for EVs also presents new opportunities in the workforce, with many new jobs being created in industries such as battery production, electric vehicle manufacturing, and charging station installation. As technology improves, it's clear that electric vehicles will play a significant role in the future of transportation.

---

4. What can be inferred about the growth of electric vehicles?

---

5. How might the rise of electric vehicles affect the job market?

Part 3: Writing Task

Essay Prompt:

Do you think artificial intelligence (AI) will significantly impact the future of business and jobs? Explain why or why not, providing examples to support your answer.

- **Word Count: 150-200 words**
- **Use: Simple and complex sentence structures, clear introduction, body, and conclusion.**

Part 4: Vocabulary Matching

Match the words with their correct meanings.

Word	Meaning
Technology	a) The use of advanced systems or machines to do tasks efficiently.

Word	Meaning
Sustainability	b) The development and application of scientific knowledge to practical purposes.
Innovation	c) The ability to continue indefinitely without depleting resources.
Efficiency	d) The process of introducing new ideas or methods.

Part 5: Grammar Task

Fill in the blanks with the correct form of the verb in parentheses.

6. If we _____ (use) renewable energy, we would reduce our reliance on fossil fuels.

7. Many businesses _____ (invest) in AI technology in the past few years.

Model Answer:

Part 1: Reading Comprehension

1.   c) It offers flexibility, eliminates commuting, and allows work from anywhere.
2.   b) Workers feel isolated and struggle with work-life balance.
3.   c) Remote work is expected to stay, with hybrid models being common.

Part 2: Inference Questions

4.   It can be inferred that electric vehicles (EVs) are becoming more important in the transition to cleaner energy sources. As governments offer incentives and more companies invest in EV technology, it is expected that these vehicles will become a common mode of transportation.
5.   The rise of electric vehicles is likely to create new jobs in industries such as battery production, electric vehicle manufacturing, and the development of charging infrastructure. This will impact the job market by increasing employment opportunities in these sectors.

Part 3: Writing Task

(Note: Sample response should meet the given requirements.)

Artificial intelligence (AI) is likely to have a significant impact on business and jobs in the future. On one hand, AI can improve efficiency by automating repetitive tasks, reducing costs, and enhancing productivity. For example, AI is already being used in industries like healthcare for diagnosing diseases and in customer service for handling inquiries. However, there are concerns about job displacement as machines take over roles traditionally held by humans. While AI will certainly transform industries, it also presents opportunities for new jobs, such as in AI development, data analysis, and robotics. In conclusion, although AI may change the landscape of work, it will also create new opportunities for those who can adapt to the technological advancements.

Part 4: Vocabulary Matching

- **Technology - a) The use of advanced systems or machines to do tasks efficiently.**

- **Sustainability - c) The ability to continue indefinitely without depleting resources.**
- **Innovation - d) The process of introducing new ideas or methods.**
- **Efficiency - b) The development and application of scientific knowledge to practical purposes.**

Part 5: Grammar Task

6.   **If we used renewable energy, we would reduce our reliance on fossil fuels.**

7.   **Many businesses have invested in AI technology in the past few years.**

Part 8: Final Reading Comprehension

Instructions: Read the passage below and choose the best answer.

Text:

The world's oceans are filled with diverse marine life, from the smallest fish to the largest whales. However, pollution is threatening these ecosystems. Human

activity, such as dumping waste into the water and overfishing, has caused many species to become endangered. Protecting the oceans is vital for the survival of marine life and for maintaining the balance of our planet's ecosystems.

15. What is a significant threat to marine life?

A) Pollution

B) Overpopulation

C) Climate change

16. Why is protecting the oceans important?

A) To promote tourism

B) To maintain the balance of ecosystems

C) To increase fishing

Part 1: Writing Task – Opinion Question

Question: Do you think people should be allowed to hunt wild animals? Why or why not?

Model Answer: People should not be allowed to hunt wild animals because it can lead to the extinction of endangered species. Hunting disrupts the natural balance of ecosystems, causing harm to biodiversity. Additionally, animals have a right to live freely in their natural habitats, and humans should protect them

instead of using them for sport or food. In conclusion, hunting threatens our environment, and we must take steps to preserve wildlife.

Part 2: Writing Task – Plan for an Essay

Essay Prompt: Write an essay about the importance of recycling in protecting the environment.

Model Answer: **Introduction**:

- State the importance of recycling in preserving natural resources.
- Mention the growing environmental problems due to waste.

Body:

- **First point**: Recycling reduces waste and saves space in landfills.
- **Second point**: It conserves natural resources like trees and minerals.
- **Third point**: Recycling reduces energy consumption and pollution.

Conclusion:

- Summarize the environmental benefits of recycling.
- Encourage people to make recycling a daily habit for a better future.

Part 3: Writing Task – Extended Response

Essay Prompt: Write an essay on how animals help in maintaining balance in the ecosystem.

Model Answer: Animals play a vital role in maintaining the balance of ecosystems. Firstly, predators control the population of herbivores, preventing overgrazing. For example, wolves in Yellowstone National Park regulate the number of deer, which helps preserve plant life. Secondly, animals like bees and butterflies pollinate plants, promoting the growth of fruits and flowers. Lastly, decomposers like worms and fungi break down dead organic matter, returning nutrients to the soil. Therefore, the diversity and health of animal species are essential for the survival of ecosystems and the planet.

Part 4: Free-response Question (Inference)

Text: [Sample narrative or informative text]

Question: What is the main reason the author believes animals should be protected?

Model Answer: The author believes animals should be protected because they are essential for maintaining the balance of the natural world. Without animals,

ecosystems would fail to function properly, and human life would be adversely affected.

Justification: The author explains that animals contribute to crucial processes such as pollination, controlling pests, and supporting biodiversity, which ultimately affects human well-being.

Part 5: MAZE Task – Below-Level Text

Sentence: The giraffe is the tallest animal in the world, and it can reach up to five meters in _____.

Options: a) height

b) length

c) weight

Model Answer: a) height

Part 6: MAZE Task – At-Level Text

Sentence: Recycling is essential for reducing the _____ of waste in landfills.

Options: a) amount

b) size

c) danger

Model Answer: a) amount

Part 7: Multiple-Choice Questions – Below-Level Reading Text

Text: [Short reading comprehension text on a familiar topic]

Question 1: What is the main idea of the passage?

- a) Animals help protect plants.
- b) Recycling helps conserve resources.
- c) Animals are endangered.

Model Answer: b) Recycling helps conserve resources.

Part 8: Multiple-Choice Questions – At-Level Reading Text

Text: [Narrative or informative text about animals or the environment]

Question 1: What is the author's purpose in the text?

- a) To explain the importance of animals in ecosystems.

- b) To describe the effects of deforestation on wildlife.
- c) To argue for animal rights.

Model Answer: a) To explain the importance of animals in ecosystems.

Part 9: Multiple-Choice Questions – Reading Comprehension

Text: [Extended text on environment or related topic]

Question 1: What did the author mention as one of the main causes of climate change?

- a) Overhunting of animals.
- b) Deforestation and fossil fuels.
- c) Excessive rainfall.

Model Answer: b) Deforestation and fossil fuels.

Part 10: Multiple-Choice Questions – Reading Comprehension

Text: [Reading text on a concrete topic such as waste management]

Question 1: Which of the following is not mentioned as a benefit of recycling?

- a) Reduces pollution.
- b) Saves energy.

- c) Increases waste.

Model Answer: c) Increases waste.
