Travelling the World

Traveling is one of the most exciting experiences people can have. When you travel, you get to see new places, meet new people, and learn about different cultures. Some people enjoy traveling to big cities where they can visit famous monuments, museums, and parks. Others prefer visiting small villages, where they can experience a quieter, more traditional way of life. No matter where you go, traveling opens your eyes to the world and helps you see things from new perspectives. Traveling can also be a fun way to escape from everyday routines and have a fresh start, even if just for a short time.

In addition to being exciting, traveling can also be educational. When people visit a new place, they learn about its history, customs, and lifestyle. For example, when visiting another country, travelers often get to try different types of food, listen to new music, or even learn a few words of the local language. Many travelers find that they come back from their trips with new knowledge and a deeper understanding of other cultures. Furthermore, traveling can teach people valuable life skills, like how to plan, budget, and be flexible when things don't go as planned.

However, there can also be challenges when traveling. Planning a trip can take time, especially when choosing a destination, finding places to stay, and figuring out transportation. Sometimes, people experience language barriers, which can make it harder to communicate with locals.

Traveling can also be expensive, so it's important to plan a budget. Despite these challenges, many people feel that the benefits of traveling outweigh the difficulties. Traveling helps people grow, develop new perspectives, and create memories that last a lifetime.

Questions

1. What is one main benefit of traveling according to the passage?
 - a) Earning more money
 - b) Making new friends
 - c) Experiencing different cultures
 - d) Buying new clothes
2. Why might some people prefer to visit small villages over big cities?
 - a) To see famous monuments
 - b) To experience a quieter way of life
 - c) To avoid learning new languages
 - d) To go shopping
3. Which skill does traveling help people develop, as mentioned in the passage?
 - a) Cooking
 - b) Driving
 - c) Planning and budgeting
 - d) Painting

4. What challenge is mentioned in the passage related to traveling?
- a) Finding new hobbies
 - b) Learning a new sport
 - c) Planning the trip
 - d) Becoming a local guide
5. How does traveling help people learn about other cultures?
- a) By watching movies
 - b) By meeting locals and experiencing new customs
 - c) By reading about their culture at home
 - d) By going to theme parks

Reading II

The rapid industrialization of the last two centuries has had a profound impact on the Earth's environment. Factories release pollutants into the air, water, and soil, which have significant repercussions on human health and biodiversity. Emissions from cars and industries contribute to the greenhouse effect, a phenomenon where heat is trapped in the Earth's atmosphere, leading to global warming. Scientists have recorded a steady increase in global temperatures over the past few decades, and the consequences are visible worldwide, including extreme weather events, rising sea levels, and melting glaciers.

Deforestation is another major environmental issue. Forests play a crucial role in absorbing carbon dioxide and producing oxygen, helping regulate the Earth's climate. However, forests are being cleared at an alarming rate for agriculture, urban development, and logging. This loss of

trees not only accelerates global warming but also destroys habitats for numerous species, leading to biodiversity loss.

To combat these challenges, international organizations and governments are pushing for sustainable practices and renewable energy sources. Transitioning from fossil fuels to solar, wind, and hydroelectric power can reduce carbon emissions. Individuals can also contribute by reducing energy consumption, recycling, and supporting eco-friendly policies. While these measures require cooperation and commitment, they are essential to ensuring a sustainable future for the planet.

Questions:

1. What is the greenhouse effect?

- a) The cooling of the Earth's surface
- b) The trapping of heat in the Earth's atmosphere
- c) The reflection of sunlight by polar ice
- d) The absorption of carbon dioxide by plants

2. What role do forests play in the environment?

- a) They increase urban development
- b) They absorb carbon dioxide and produce oxygen
- c) They contribute to industrial pollution
- d) They release pollutants into the atmosphere

3. Which of the following is a direct consequence of deforestation?

- a) Increased biodiversity

- b) Reduced global warming
 - c) Habitat loss for species
 - d) Decreased carbon dioxide levels
4. **What are some effects of global warming mentioned in the passage?**
- a) Increased rainfall and cooler temperatures
 - b) Melting glaciers and extreme weather events
 - c) Stabilization of sea levels
 - d) Reduced greenhouse gas emissions
5. **Why are renewable energy sources important?**
- a) They help reduce carbon emissions
 - b) They increase deforestation rates
 - c) They contribute to the greenhouse effect
 - d) They are limited to fossil fuels
6. **How can individuals help combat environmental issues?**
- a) By using more fossil fuels
 - b) By reducing energy consumption and recycling
 - c) By clearing more land for agriculture
 - d) By increasing greenhouse gas emissions
7. **What is one major cause of biodiversity loss mentioned in the passage?**
- a) Global warming
 - b) Deforestation

- c) Renewable energy
- d) Recycling

READING III

Understanding Business

A business is an organization or entity that produces goods or provides services to meet the needs and wants of customers. The main goal of a business is to make a profit, which is the money left over after all expenses are paid. Businesses can be small, like a family-owned bakery, or large, like multinational corporations. To make money, businesses must understand what customers need and want and offer products or services that meet those needs. Successful businesses constantly look for ways to improve their products and services, and they often invest in research and development to stay competitive. Companies may also focus on building strong relationships with customers to encourage repeat purchases.

In business, there are many types of companies that operate in different industries, such as manufacturing, retail, healthcare, and technology. Manufacturing companies make products like clothes or electronics, while retail companies sell goods to consumers. Healthcare businesses provide medical services, and technology companies create products like computers and software. Each industry has its own challenges and requirements. For example, technology companies need to innovate regularly to keep up with changes in technology. On the other hand, healthcare businesses need to follow strict regulations to ensure patient safety. A key factor for success in any industry is the ability to adapt to changes, such as new laws, economic shifts, or changing customer preferences.

A successful business also depends on effective management and teamwork. Managers are responsible for planning, organizing, and leading their teams to achieve the company's goals. Good managers communicate clearly with employees, provide feedback, and motivate the team to work together. Employees contribute their skills and effort to help the business succeed, and

companies often reward them with salaries, bonuses, or benefits. Building a positive work environment is also essential because happy employees are often more productive. Many companies also care about their impact on society and the environment, so they may adopt practices that are sustainable and ethical. By balancing profit with social responsibility, businesses can create a positive reputation and attract loyal customers.

Questions

1. **What is the main goal of a business?**

- a) To meet customer needs
- b) To invest in technology
- c) To make a profit
- d) To improve teamwork

2. **Which type of company is most likely to focus on patient safety?**

- a) Manufacturing
- b) Healthcare
- c) Retail
- d) Technology

3. **What do successful businesses often invest in to stay competitive?**

- a) Office supplies
- b) Advertising
- c) Research and development
- d) Employee benefits

4. Which industry creates products like computers and software?

- a) Retail
- b) Technology
- c) Manufacturing
- d) Healthcare

5. Why is building a positive work environment important?

- a) It attracts more customers
- b) It makes employees more productive
- c) It helps managers save money
- d) It reduces product costs

6. What can companies do to build strong relationships with customers?

- a) Invest in advertising
- b) Focus on profits only
- c) Build customer loyalty
- d) Increase prices

MAZE 1

The business world is constantly evolving, and new trends (1) _____ (a. will introduce / b. will be introduced / c. will have introduced) each year to meet customer demands. One of the most significant trends predicted for the coming years is the use of artificial intelligence (AI) in

customer service. AI-powered chatbots and virtual assistants are expected to improve customer interactions, making it (2) _____ (a. easier / b. the easiest / c. the most easily) for customers to find answers quickly. According to experts, AI (3) _____ (a. will transform / b. will be transformed / c. will have transformed) customer service in ways we cannot yet fully imagine. Among these changes, customer experience will become (4) _____ (a. important / b. more important / c. the most important) factor in maintaining a competitive edge. With companies racing to provide the best services, businesses that fail to innovate (5) _____ (a. will leave behind / b. will be left behind / c. will be leaving behind) by their competitors.

MAZE II

In recent years, the job market has experienced numerous shifts, and experts (1) _____ (a. suggest / b. had suggested / c. have suggested) that automation will soon impact many industries. For instance, by the year 2030, many traditional tasks (2) _____ (a. will be replaced / b. will have been replaced / c. could be replaced) by artificial intelligence (AI) and machine learning, especially in manufacturing and data entry roles. According to a recent study, about 85% of the jobs that will exist in 2030 (3) _____ (a. did not exist / b. had not existed / c. will not have existed) in 2020. This trend has led some analysts to argue that workers (4) _____ (a. need / b. needed / c. have needed) to develop new skills and continuously adapt to changes to remain relevant.

Moreover, as remote work becomes more popular, companies (5) _____ (a. have been requiring / b. will have required / c. are required) to invest in digital tools and secure networks to support flexible work environments. A recent survey (6) _____ (a. suggested / b. suggests / c. had suggested) that companies focusing on these digital advancements (7) _____ (a. are more likely / b. were more likely / c. would have been more likely) to retain their employees. However, some industries may find it challenging to keep up, and smaller businesses (8) _____ (a. had struggled / b. may struggle / c. will have struggled) to afford the latest technologies.

WRITING

Part 1: Opinion Question

Write your answer below. Use full sentences.

1. Do you think starting a new business is a good idea? Why?

Part 4 & 5: Inference and Justification

Mariyam had always dreamed of opening her own business. For years, she planned, saved, and researched, determined to bring her passion for sustainable fashion to life. Finally, she felt ready to take the plunge, setting her sights on opening a small boutique featuring eco-friendly clothing and accessories. But as soon as she began the journey, obstacles emerged.

The first challenge came when Mariyam struggled to secure a loan. Despite her detailed business plan, banks were hesitant, questioning her lack of prior experience. After months of trying, she finally managed to get a small loan from a local credit union, but it was less than she'd hoped for, which meant cutting back on her initial vision. Instead of a full-fledged store, she rented a small space in an out-of-the-way location and had to forego hiring any staff, opting to run everything herself.

Setting up the boutique was an even bigger challenge. Mariyam quickly realized that the cost of sustainably produced clothing was much higher than conventional items. She had to get creative, scouring wholesalers for affordable, ethical brands and even partnering with local artisans. To her dismay, many potential suppliers were wary of her unproven business, making negotiations tense and difficult.

Once she opened, foot traffic was slow. Her location, although affordable, wasn't ideal, and she couldn't afford a marketing budget. Mariyam tried to build a presence on social media, spending long hours creating content and reaching out to influencers. She spent her days in the boutique and her nights on marketing, slowly attracting a small following.

For months, Mariyam barely broke even. Discouragement set in, and she wondered if she'd made a mistake. Yet, despite her struggles, she refused to give up. Slowly, word of her boutique spread, her loyal customers sharing their love

for her unique, eco-conscious items. Her determination began to pay off as her customer base grew, and she finally felt her hard work was bearing fruit. Looking back, Mariyam realized that the difficulties she'd faced had made her business stronger. Her boutique became a symbol of resilience, and she was proud of every struggle that had brought her closer to her dream.

Inference Question

Was Mariyam successful in her business?

.....
.....
.....
.....
.....

Justification Question

Why is your answer to the inference question the best answer?
Use information in the text above to support your answer.
