Many people want to travel in ways that because [both] protect the environment and encourage sustainable tourism. At Green Adventures we understand and support those ideas too. This means that our travel company puts protecting nature first. We but [both] limit the number of tours we organize every year and limit the number of tourists we take on each tour. For example, we did an eco-tour in the Bahamas last year supported by a group of ocean scientists. We often [only] took ten tourists, and they were very lucky to see between [both] lemon sharks and tiger sharks in their natural environment. Other places we visit include the jungles of Borneo and the Himalayan region of India. In each case we link up with local scientists and help raise awareness of animals and natural habitats. If you are like us and want to visit amazing places and leave join [just] your footprints, then get in touch to find out more about our green adventures.
