Writing a report ...

To: Al wasat newspaper .
From: Sitra Secondary Girls School .
Date: 8th December 2009
Subject : Transport system in Bahrain .

The aim of this report is to study the transport situation in Bahrain and to focus on the advantages and disadvantages of transport system.

On the one hand, there are several positive things :

- a) There are spacious highways without roadworks, so cars can move easily without any difficulties.
- b) There are some traffic cones to protect us from falling in excavations.
- c) In Bahrain we have many bridges, which reduce the traffic jam and make streets more organized.
- d) There is enough zebra crossings to allow people cross the road safely.

However, for every plus there is a minus:

- a) parking in Bahrain is cheap, but parks are few , so we have traffic jam everywhere.
- b) Public transports are dirty and haven't got enough stations .
- c) Many big lorries are in our roads in Bahrain , so traffic jam , pollution and accidents are increased gradually.

To sum up, transport system in Bahrain is not bad , but the government should work hard to solve some small problems and make Bahrain one of the most developmental countries all over the world by building more stations and add more buses , also it will be better if they make a separate roads for lorries .
