A Problem-Solution Essay

(1) "Plastic Waste" is a big issue in most cities around the world. Write an essay that describes this problem and proposes practical solutions. (200-250 words)

Solutions to the Problem of Plastic Waste

No one can deny that **plastic waste** is one of the serious environmental problems that threatens the world we live in nowadays. **Large amounts of plastic enter the oceans every year and get into the bodies of fish, birds, and animals and make them sick.** In order to solve these issues, individuals, companies, and governments all need to take action.

Some people might argue that the actions of individual people will not affect **plastic waste** much. In my view, however, people can definitely help by **reducing the amount of plastic they use and by reusing and recycling plastic products.**

Companies can also help solve the problem of **plastic waste**. They could **make products from other materials, such as glass or metal, instead of plastic.** They could **stop using plastic to wrap the items they make.** In my experience, this approach would definitely reduce **plastic waste**.

Finally, governments can help deal with the issue of **plastic waste**. They could **ban plastic shopping bags and require paper ones.** They could also raise taxes for companies that use **plastic** and reduce taxes for those who use **other materials.** Furthermore, they could arrange campaigns to raise people's awareness about the dangers of **plastic waste**.

In conclusion, although **plastic waste** is a serious problem and a big challenge, it is one that can be overcome if we all work together. Through the joint actions of individuals, businesses, and policymakers, we can contain this environmental threat and ensure a healthier, safer and more sustainable future.

(2) "Water Scarcity" is a big issue in most cities around the world. Write an essay that describes this problem and proposes practical solutions. (200-250 words)

Solutions to the Problem of Water Scarcity

No one can deny that **water scarcity** is one of the serious environmental problems that threatens the world we live in nowadays. **It affects millions of people and causes problems with farming, health, and economies.** In order to solve this issue, individuals, companies, and governments all need to take action.

Some people might argue that the actions of individual people will not affect **water scarcity** much. In my view, however, people can definitely help a lot. This is because they can **help save water by fixing leaks and installing water-efficient appliances.**

Companies can also help solve the problem of **water scarcity**. They could **adopt new technologies that minimize water use.** They could also **find innovative ways to recycle water.** In my experience, this approach would definitely reduce **water scarcity**.

Finally, governments can help deal with the issue of **water scarcity**. They could **adopt policies that encourage water saving.** They could also raise taxes for companies that **use a lot of water** and reduce taxes for companies that **adopt water saving practices.** Furthermore, they could arrange campaigns to raise people's awareness about the dangers of **water scarcity**.

In conclusion, although **water scarcity** is a serious problem and a big challenge, it is one that can be overcome if we all work together. Through the joint actions of individuals, businesses, and policymakers, we can contain this environmental threat and ensure a healthier, safer and more sustainable future.

(2) "Air Pollution" is a big issue in most cities around the world. Write an essay that describes this problem and proposes practical solutions. (200-250 words)

Solutions to the Problem of Air Pollution

No one can deny that **air pollution** is one of the serious environmental problems that threatens the world we live in nowadays. **It arises from various sources, including industrial emissions and vehicle exhaust leading to respiratory diseases and other health problems.** In order to solve this issue, individuals, companies, and governments all need to take action.

Some people might argue that the actions of individual people will not affect **air pollution** much. In my view, however, people can definitely help a lot. This is because they can **help by reducing car usage, using public transport, biking, or walking.** They can also **adopt energy-efficient appliances and minimize waste to reduce air pollution.**

Companies can also help solve the problem of **air pollution.** They could **make products from eco-friendly materials.** They could also **adopt green practices, like recycling and reducing waste.** In my experience, this approach would definitely reduce the harmful effects of **air pollution.**

Finally, governments can help deal with the issue of **air pollution.** They could **enforce strict laws to control emissions from industries and vehicles.** In addition, governments could impose taxes on those who help to make the situation worse. Furthermore, they could arrange campaigns to raise people's awareness about the dangers of **air pollution.**

In conclusion, although **air pollution** is a serious problem and a big challenge, it is one that can be overcome if we all work together. Through the joint actions of individuals, businesses, and policymakers, we can contain this environmental threat and ensure a healthier, safer and more sustainable future.

(4) "Deforestation" is a serious problem in most cities around the world. Write an essay that describes this problem and proposes practical solutions. (200-250 words)

Solutions to the Problem of Deforestation

No one can deny that **deforestation** is one of the serious environmental problems that threatens the world we live in nowadays. **It occurs when forests are cleared for agriculture or urban development, leading to habitat destruction, increased carbon emissions and global warming.** In order to solve this issue, individuals, companies, and governments all need to take action.

Some people might argue that the actions of individual people will not affect **deforestation** much. In my view, however, people can definitely help a lot. This is because they can **reduce paper and wood consumption.** They can also **support sustainable products and participate in reforestation efforts.**

Companies can also help solve the problem of **deforestation.** They could **adopt green practices, like implementing zero-deforestation policies, using eco-friendly materials, and supporting reforestation projects.** In my experience, this approach would definitely reduce the harmful effects of **air pollution.**

Finally, governments can help deal with the issue of **deforestation.** They could also **enforce strict laws to protect areas, provide incentives for sustainable agriculture, and support communities that help preserve forests.** In addition, governments could impose taxes on those who help to make the situation worse. Furthermore, they could arrange campaigns to raise people's awareness about the dangers of **deforestation.**

In conclusion, although **deforestation** is a serious problem and a big challenge, it is one that can be overcome if we all work together. Through the joint actions of individuals, businesses, and policymakers, we can preserve forests and ensure a healthier, safer and more sustainable future.
