**Coffee lovers, behold !**

Nowadays everyone is so creative, making their favorite cup of coffee at home! I wanted to be my own barista and that's why I decided to get the Nespresso CitiZ machine from Amazon. So far, I'm in love!

There are many things to love about this coffee machine. To start with, it has a sleek and modern design. Yes, this is important to me since I'm placing this machine in my coffee corner in the center of my room. I got mine in black and white lines and I absolutely love it. Another thing that I like about this machine is that it makes less noise than other machines that I have used in the past. Added to this, this coffee machine is a game-changer! It makes different types of coffee with a press of a button. It's user-friendly and super quick. Moreover, the clean-up of this coffee machine is easy. Last but not least, you can easily find coffee capsules that are compatible with this machine. So far, I've tried so many flavors such as espresso, mocha, latte, americano and flat white. I also tried some cold coffee flavors and I just had to add some ice!

Although I love my new coffee machine, there is one big downside which is the price. I paid around BD 200 for this machine which is a lot! I wish it was less expensive so many people can afford it and try making delicious coffee at home. Another thing that I didn't like was the long waiting. I placed my order online in mid-March and only got my coffee machine in June!

All-in-all, if you're a coffee lover looking for a quality and sleek coffee machine and you don't mind the wait, then Nespresso Citiz is the way to go. It's a fantastic investment that I highly recommend.
