From: -----  
Date: -----  
Subject: Traffic in Manama

The aim of this report is to examine the traffic situation in Manama, which is considered an important and vital center for different businesses, services and trade.

On the one hand, there are some good points about the traffic in Manama:

- a. To begin with, in the last few years the governments of Bahrain has built a number of Bridges at different places to overcome the traffic jams especially occur at roundabouts at rush hours.
- b. It has also created more zebra crossings at school zones and found more parking meter areas for drivers.
- c. The speed limit signs on the city highways and the warning humps inside the city have clearly cut down the number of traffic accidents caused by the speedy reckless motorists.

On the other hand, there are some bad points:

- a. The great number of people going to their jobs in the morning as well as schoolchildren always lead to traffic jams and heavy traffic cones.
- b. The lack of enough meter parking zones in the city makes some motorists double park, which in turn results in slow traffic.
- c. Increasing the number of traffic police in the streets and patrolling the high ways will help control the heavy traffic in the city.

To sum up, I think it is time the city hall of Manama took serious and effective steps concerning the traffic situation in this prosperous attractive city and act accordingly.
