17. Fill in the gaps (4 marks)

What is love? The writer of "The Chemistry of Love" believes that falling in love is influenced by our brain chemistry. This connection between the way we feel(1)..... the way our bodies function is his main concern. Falling in love gives you extra energy. Your heart beats faster and you feel optimistic. Love meets our emotional needs, this makes everything look possible and rosy and we work better.(2)..... book says we are programmed at birth(3)..... produce endorphins when we are in close relationships. It is nature's way of keeping us together.(4)..... the relationship ends - or we are afraid it might end - production of endorphins stops.

B – Reading (10 marks)

Read the passage, and then answer the questions (10 marks)

Your goal is something that you want to do. First you should decide what that goal is. Do you want to pass an exam? Do you want to be a doctor? Do you want to be wealthy? Think about what you want and decide on your goal. You should write your goal on a piece of paper. Put your goal poster on your wall and look at it every day. Then decide what you have to do to achieve your goal. Some people never reach their goal because they think it is impossible. You should think positively. Don't think "the exam is difficult and I will probably fail it, "instead you should think "The exam is difficult, but I have worked hard and will pass it ". People who think negatively seldom reach their goals, so be positive!

We are most successful at things we enjoy. So you should try to enjoy your work. Look at your goal poster. Think how happy you will be when you have reached your goal. Think about that happiness while you are working and you will enjoy your work.

A. Choose the correct answer (4 marks)

1. The best title for the passage is.....

- a. How to be a doctor
- b. Three ways to reach your goal
- c. The best way to pass an exam
- d. How to make a goal poster
