Answer the following questions:The First Question:Put (✓) in front of the correct statement, and put (✗) in front of the wrong one:

1	It's possible to concatenate between (String Values) by using the symbol &.	()
2	It's possible to declare about a variable storage its name is Gender to store in it whether it is from a male or female by writing the following code: Dim Gender As Boolean= "Male/Female"	()
3	"Outing" is dissemination of information about specific person or more abusively.	()
4	It is a set of commands and instructions under a certain name when executing it return with a value is called (Sub).	()
5	The statement (Do while ... loop) can be executed for unknown number of iterations.	()
6	It's possible to write the following code (Dim K As Integer) to declare a stable numeric called K.	()
7	The phrase (SelectCase) when branching depends on one variable value and there are many conditions	()
8	The numeric value (Step) that follows (For....Next) could be positive or negative.	()

The Second Question:Choose the correct answer:

- The command that's used in writing remarks that can be referred to within the code in Visual. Basic. Net language.
(a) Rem (b) VbCrLf (c) Comment
 - The result of executing the code :For N= 1 to 3 step 0 : MsgBox(N) :Next is printing.....
(a) numbers from 1 to 3 (b) number 1 continually (c) number 3 continually
 - When getting incorrect results after running the program it's a proof that a fault happens its type is
(a) Syntax (b) Run -time (c) Logical
 - The result of executing a statement MsgBox(6Mod2) is.....
(a) 0 (b) 3 (c) 4
 - The conditional code (IfThenElse) is written after.....
(a) If (b) Then (c) Else
 - Ignoring one person or more through the electronic media.
(a) Cyber stalking (b) Anonymity (c) Exclusion
- (بقية الأسئلة في الصفحة الثانية)

The Third Question:

Complete with the suitable term:

- 1-one of Integer Numeric Types its minimum range is 0 and its maximum range is 255.
- 2-expresses the current window (Form) when writing inside its code window.
- 3-it's a command that's used to declare constants in VB.Net language.
- 4-a word by it starts declaring the **(Function)** when creating it.

The Fourth Question:

Read the following codes then answer the questions:

(1)

```
Dim K As Byte =1
Dim M As Byte=3
K=K+2
If K < M then MsgBox("Egypt"Else
MsgBox("Cairo")
```

- (A) What is the result of the condition that 's used in the previous code (True or False).....
- (B) After executing the code a message appears in it (Cairo or Egypt)?.....

(2)

```
Dim N, SUM As Integer
SUM= 0
For N = 1 to 3 step 2
SUM = SUM + N
Next
```

In this code, we have used the Variable N as the counter of iterative loop **For.....Next**

- (A) The starting value of the counter or the iterative loop is.....
- (B) The end Value of the counter is
- (C) The value of the increment of the counter is
- (D) The final value of the variable SUM after executing the code it becomes.....
