ARRIVING AT FINAL SCORES

LST/ RDG: In these two sections, all student responses are of the objectively-marked, right-or-wrong type. So, there should never be any discrepancies in the marks awarded.

Action required: With 'short answer' items, there may be (accidental) discrepancies in the scores awarded by the two markers. The Supervisor/Adjudicator should be on the lookout for any such discrepancies, and if they occur, should read the students' response and award the correct mark.

WRITING: In this section, student responses are independently marked by two markers using their judgement (based on the wording of the Rating Scale provided). As a result, differences may sometimes occur between the two scores awarded.

In such cases, there are two possible procedures:

- 1) Acceptable differences: If – as in most cases – the difference between the two scores is small, i.e. just **one level**, the Supervisor/Adjudicator is not required to read the student's response. He/She should simply use the mathematical average of the two scores. (*See below)
- 2) Unacceptable differences: However, if the difference between the two scores is substantial, i.e. **more than one level**, the Supervisor/Adjudicator should read the student's response and, after due consideration, decide on an appropriate mark.

CALCULATION OF AVERAGES:

WRT 1		WRT 2	
Pair of scores	Final score	Pair of scores	Final score
10 / 8	9	10 / 8	9
8 / 6	7	8 / 6	7
6 / 4	5	6 / 4	5
4 / 2	3	4 / 2	3
2 / 0	1	2 / 0	1

IMPORTANT NOTE: As in previous years, **individual** markers should **only** award the marks specified in the relevant Rating Scale* (as in 'pair of scores' above). 'In-between marks' (as in 'final score' above) can **only** be awarded when two (differing) individual marks are combined by the Supervisor/ Adjudicator.

[* Note: This means that, even though the computer screen shows all the possible final scores, **individual** markers should **only** use those scores which are mentioned in the scale.]
