READING 2 (Items 8-15)**(8 marks)**

Read the text. Then for each item, shade in the bubble next to the correct option.

I've always wanted to have a laptop, but I could never afford a good one because they cost a lot. One day I began searching online for cheap laptops, and I found used laptops that were from factories, but had been updated. I thought these laptops looked like a good idea because they would have been gone through checks and tests to ensure they had no viruses or damage and were in a good working condition.

The deal looked fantastic and they were just as good as the laptops being sold in computer shops. They had been under warranty and were being sold at half the price of the ones in the shop. Later that day, I made the decision that I would get a laptop from a factory shop using my internet account. I went through the usual process of clicking on the 'Buy it Now' link confirming purchase and making the payment. Once that was done, I received an e-mail saying that I had bought the item and it would arrive on the 22nd of May.

On 21st of May, I went to check my post office box. Inside I found a large brown parcel and immediately knew that the only thing it could be was the Laptop. When I finally opened the parcel and looked at the laptop, it was everything I had ever wanted, it was black it had a perfect screen with no scratches, a smart brown lid, and a full set of white keys. Everything was in perfect working condition. I have had the laptop for about a year now and I am using it perfectly. I have all the applications I need, including Word Processing, Excel, and PowerPoint. However, I couldn't connect the laptop to the wireless network because Bluetooth software was not installed.

Actually, the laptop has been a good bargain. Even it was still costly, it would have been double the price I had purchased it from the high street shops.
