READING 2 (Items 6-10)   (5 marks)

Read the text and choose __True__ or __False__?

I was talking to some friends yesterday about robots. Everyone thinks that there won't be any jobs left for us in the future because robots will do all our jobs instead. 'They're coming for our jobs,' one friend said.

Robots do a lot of the jobs that people used to do in the past. For example, robots make cars in factories and milk cows on farms. It just means that people can do more interesting jobs now. In the future, it's true that robots will do more jobs. For example, they will do housework and drive cars.

Also, robots will never have ideas or feelings. A robot will never take care of a sick person like a nurse.
