## عروض شفوية (مواضيع برزنتيشن)

Presentations

### Salalah ١ ١

Salalah is one of the most attracting cities in Oman , especially during the khareef season .Each year , from the mid of June till the mid of September , monsoon clouds cover the sky of salalah ,accompanied by rain and constant cool drizzle . The temperature drops down and cool breeze blows from the mountains , which turns salalah into a beautiful verdant green paradise .the emerald green mountains and the charming waterfalls are very eye catching .khareef season makes salalah the perfect place to visit during the summer .Tourists come from around the world to spend their holidays flying kites and camping on the green fields and valleys. Kite flying has become very popular. Kites of different colours , shapes and sizes decorate the sky ,which make it a wonderful view .Also, delicious kinds of tropical fruits and sweet tender coconut can be eaten at the fruit stalls that are scattered among the streets , under the looming coconut palms . salalah is the best place to visit in summer. Salalah is also widely famous for it's aromatic incenses and luban that people love to buy for the sweet smells that it produces

### Water

Water is very important is our live .We cannot live without it .People , animals and plants would die if they do not have water . water is used for many things. It is used for drinking ,cleaning , farming and industry . About three quarters of the world is covered by water .there are many sources of water . they are rainwater ,seawater , underground water and river water . seawater is not good for drinking .it is too salty .About 90% (ninety percent) of all the fresh water in the world in the Antarctica. finally ,we can say that water is as precious as gold

mobile phone

The mobile phone can be used to communicate over long distances without wires. It works by communicating with a nearby base station (also called a "cell site") which connects it to the main phone network. When moving, if the mobile phone gets too far away from the cell it is connected to, that cell sends a message to another cell to tell the new cell to take over the call. This is called a "hand off," and the call continues with the new cell the phone is connected to. The hand-off is done so well and carefully that the user will usually never even know that the call was transferred to another cell

As mobile phones became more popular, they began to cost less money, and more people could afford them. Monthly plans became available for rates as low as US\$30 or US\$40 a month. Cell phones have become so cheap to own that they have mostly replaced pay phones and phone booths except for urban areas with many people

 CARS 

A car (or automobile) is a wheeled motor vehicle used for transportation. Normally, car seats fit from 1 to 8 passengers. Cars have four tires, and mainly transport people rather than goods. Cars came into global use during the 20th century

:The difference between big and small cars

Big cars are very heavy compared to smaller cars and usually have <sup>3</sup> more interior space for passengers which is about 8 seats. Bigger cars consume a lot more fuel due to their heavy mass. Examples :  
.. Armada, land cruiser

Smaller cars are much lighter and can fit about 4 passengers. <sup>3</sup>  
Smaller cars need less fuel to travel and move, and are also easier to  
..control and drive. Examples: Camry, Avalon

A smaller car will probably get better economy and better  
performance from the same engine size simply because there is less  
..weight to lug around

:Top countries that produce the most cars

- Japan - China - Brazil - India

- South Korea - Germany

United States - Mexico - Spain

In my opinion, cars are very important and very much needed in our  
..daily lives because they provide common means of transportation

😊 "How to make your life happy"?? 😊

Many people think that being rich and having a lot of money can  
make your life happy and joyful. But the truth is, we don't need  
..money to be happy

There are many things that can make our lives happier, For example,  
praying to Allah and obey to his commands, praying the 5 prayers  
each day, reading the quran and going to hajj or omrah. These are all  
things that makes your life better. Also respecting your parents and  
..loving them

Finally, I wish you all find your happiness and have a good life..

### 🍫 Chocolate 🍫

Chocolate is a food made from the seeds of a cacao tree . it is used in many desserts like pudding . cakes candy . and ice cream.it can be a solid from like candy bar or it can be in a liquid from like hot chocolate . The taste of chocolate is often described as sweet because chocolate makers usually add a lot of sugar and milk for taste. This means that chocolate can be bad for your teeth and health . it is best to eat chocolate

in moderation

## 😊Five Senses😊

Our senses allow us to learn, to protect ourselves, to enjoy our world. Can you imagine what it might be like to live your life without any of your senses? The senses usually work together to give us a clear picture of the things around us. If one sense is not working due to an accident or illness, then other senses will take over or become stronger to make up for the missing sense

.The five senses are: taste, sight, touch, smell, and hearing

---

### Taste

Our sense of taste comes from the taste buds on our tongue. The tongue is only able to taste four separate flavors: salty, sweet, sour and bitter. Not only can your tongue taste, but it also picks up texture and temperature in your food like creamy, crunchy, hot or dry

---

### Sight

Our sense of sight is all dependent upon our eyes. A lens at the front of the eyeball helps to focus images onto the retina at the back of the eye

.The brain also uses the images from two eyes to create a 3D image

---

## Touch

The sense of touch is spread through the whole body. Nerve endings in the skin and in other parts of the body send information to the brain. There are four kinds of touch sensations that can be identified: cold, heat, contact, and pain. People who are blind can use their .sense of touch to read

-----

## Smell

Our nose is the organ that we use to smell. The inside of the nose is lined with something called the mucous membranes. These membranes have smell receptors that carry the smell. Smells are .made of fumes of various substances

The sense of smell is sometimes lost for a short time when a person .has a cold

-----

## Hearing

Our ears, which help us hear, are made of two separate parts: the outer ear and the inner ear. Sound travels from the outer ear to the inner ear. The inner ear is a spiral shaped tube which translates .vibrations into sound and sends that message to the brain

## ⌚FREE TIME⌚

During school days ,I don't get that much free time because of too much homework that I need to do. I usually get about 2 free hours each day, so I spend them on things like watching TV programs. I think watching TV programs is more fun than playing video games. I also enjoy reading magazines, but I hate reading newspapers or books because it's boring for me. During my free time, I like to sit with my family and have a good time. We usually go shopping together or eat dinner in the restaurant. In the weekends, I prefer to visit my family and friends, and spend a lovely time with them and just have some fun together.

## 🇦🇴Oman's National Day🇦🇴

.Oman's National Day is on 18 November

National Day celebrates the Omani independence from the Portuguese ,as well as Sultan Qaboos Bin Said's birthday , so .Omanis celebrate this day happily

There are parades, fireworks, camel races and bullfights throughout .the country

Many Omanis return to their home villages to celebrate, so the .roads may be busier than usual

During this day, people happily greet each other and visit each other .to spend a lovely time with their friends

.I really enjoy this holiday as many activities and fun things occur

It's just a really fun time of the year .

..The end..

## 💡 Electricity 💡

Electricity is the presence and flow of electric charge.[1] Its best-known form is the flow of electrons through conductors such as .copper wires

Electricity is a form of energy that comes in positive and negative forms, that occur naturally (as in lightning), or is produced (as in a generator). It is a form of energy which we use to power machines and electrical devices. When the charges are not moving, electricity is called static electricity. When the charges are moving they are an electric current, sometimes called 'dynamic electricity'. Lightning is the most known - and dangerous - kind of electricity in nature, but sometimes static electricity

causes things to stick together. Electricity can be dangerous, especially around water

## 💻computer💻

computer

A computer is an electronic device that manipulates information or data and performs operations

automatically. The information can be numbers, words, pictures, movies, or sounds. Computer information is also called data. Computers can process huge amount of data very quickly. They also .store and display data

The Internet is run on computers and it connects millions of other .computers

### Basic Computer components:

We have  
keyboard a لوحة المفاتيح  
printer a طابعة  
a monitor الشاشة  
a CPU (central processing unit)  
headphones a سماعات  
and a mouse الفأرة

These parts of the computer are connected together with the help of .wires and cables  
now I am say one of this number and anyone say to me the name of )  
(this part

### Operating systems:

There are many famous links and well-known systems in the world . I .will talk about 5 of them

:DOS (1

.Short for Disk Operating System. One of the oldest systems used

:Windows (2

The most prominent and most popular operating system that is part .of Microsoft and started operating in 1985

:Mac OSX (3

Specifically designed for Apple Macintosh. You should pay for it .because it is not a free program

:Haiku (4

A free open source operating system. It is known for its simplicity and .fast processing. It was Released in 2011

:Chrome (5

A special OS based on Linux kernel. The desktop is special as it contains chrome's applications

### **Science and scientists:**

.William Henry Gates is one the most important figures in this field -

He was Born October 28, 1955 -

He is an American business magnate, -  
investor, author, philanthropist, humanitarian and founder of  
.Microsoft

### **How to protect your computer??**

You can download programs to protect your computer from viruses.  
..example: Avast, AVG, Kaspersky and Webroot

(Can you give more examples of programs to protect computer)

### **Advantages of computer:**

Computers have a positive effect on society, work and people, by providing immediate access to information. Computers are useful in things such as business transactions and record keeping, science and medicine, education, communication, transportation and  
.entertainment

Computer makes the world a small village where people can communicate easily and quickly. No matter is the place or the  
.time

### **Disadvantages of computer:**

Negative effects of computers include the high prices of equipment and also the loss of employment and jobs. Computers also caused crimes such as hacking into some important information of banks and  
.cards. They can also cause health and eyes problems

.In fact, it is not fully a safe environment

I will ask you a question

??Do you think computers can replace people at work

NO, computer can reduce the number of workers, but can't get rid of  
.all of them

I strongly believe computers are useful and helpful ,**In conclusion**  
.for people in so many ways

They can be used for educational purposes, paying bills, or even  
entertainment purposes like playing computer games, using social  
.media or watching movies

..The End..

👉 Life taught me 👈

People go through many situations in their lives.  
In which some are happy and joyful, while others are sad.  
All these situations can be lessons that benefit us in the future.  
- Life taught me to always wear the gown of purity and honor.

- Life taught me to be as soft as a trees' leaves, as rigid as its branches, as rough as its trunk  
and as sweet as its scent.
- Life taught me that being a slow turtle in the right path is better than being a fast deer in the  
wrong one.
- Life taught me that losing a battle teaches you how to win a war.
- Life taught me that living under a candles' light with conscience is better than living in a  
castle without one.
- Life taught me that there is no impossible goal after diving it into small steps.
- Life taught me to listen and respect all opinions, even though I don't have to agree with  
them.
- Life taught me that you are weak except in front of yourself, you uncover your inner strength  
and courage.
- Life taught me to try and try, keep trying and never lose hope, despair is the strength of the  
weak.
