## Reading

In this section, you will read a passage and answer (2) selected response questions and (3) constructed response ones. Be sure to put your answer in the space provided

1. Online education is very popular among students with jobs and families. While some online courses use Skype conferences with **instructors**, most allow students to complete coursework on their own schedules. Supporters of online education claim that it has many advantages.
2. Firstly, one can take an online course anywhere if only he has a computer and an internet connection. This is very important for individuals living in remote or rural areas who can't relocate and don't want to commute for hours to school. But it's also useful for parents who need to be able to study at home with young children. Secondly, if one finds himself struggling to keep up with difficult or fast-paced courses, he can take online programs as they allow him to either finish his coursework entirely at his own pace or give him additional time above and beyond the average school term. Thirdly, tuition for online courses is often a little bit lower than traditional classroom courses because the overhead cost is lower for the teaching institution. Online students may also save money on activity fees and similar costs paid by on-campus students.
3. However, there are some disadvantages of online education. To start with, students are not only missing instructor interaction but also colleague interaction. Research and studies showed that Online courses deprive 90% of learners of basic social interaction and limit opportunities to make new friends - or find future business partners! Another major drawback is the technology used in these courses. While some online programs keep their technology specifications simple such as a word processing program or a PDF reader, others require students to navigate complex virtual learning environments such as Blackboard or Moodle.
4. In conclusion, since online learning is still controversial, one should weigh both sides carefully, in order to decide his own preference which suits his own skills.

1. What is the text **MAINLY** about?

- A. the pros of online education
- B. the cons of online education
- C. discussing the costs of online education
- D. the pros and cons of online education**

2. Read the following sentence from paragraph 1.

While some online courses use Skype conferences with **instructors**, most allow students to complete coursework on their own schedules.

What does the underlined word “instructors” mean?

- a. hosts
- b. nurses
- c. doctors
- d. teachers**

3. According to paragraph 2, what are the advantages of online education?

Mention two.

<b>Advantage 1</b>	<b>one can take an online course anywhere</b>
<b>Advantage 2</b>	<b>if one finds himself struggling to keep up with difficult or fast-paced courses, he can take online programs</b>

4. According to paragraph 3, what are the types of interaction that students miss?

Mention two.

<b>type 1</b>	<b>instructor interaction</b>
<b>type 2</b>	<b>colleague interaction</b>

5. Based on paragraph 4, what is the writer’s opinion towards online education? What does one do toward online education?

<b>The writer’s opinion</b>	<b>one should weigh both sides carefully</b>
<b>action</b>	<b>decide his own preference which suits his own skills</b>

**Directions:**

In this section, you will read a passage and answer (2) selected response questions and (3) constructed response ones. Be sure to put your answer in the space provided.

**Should students do more group work in class?**

- 1) Many students enjoy working with their friends in class, but teachers often tell students to work quietly and alone. Is this the best way to learn, or should students do more group work in class?
- 2) On the one hand, there are many advantages to group work. Some people argue that it creates a more comfortable classroom environment because students can ask each other questions that they may be too embarrassed to ask a teacher. In addition, some teachers said, "Group work encourages students to listen to the opinions of others." This improves teamwork, which is an important skill in the workplace.
- 3) However, there are also arguments against group work in classrooms. Firstly, students may become **distracted** and chat about subjects that are not related to school. As a result, no work is achieved. Another disadvantage is that during group work, only certain opinions are heard. For example, one student may try to control the group, or another could be too shy to speak, making group work quite unfair.
- 4) All in all, more group work in class is a controversial issue. It has many advantages but there are many disadvantages, too. In my opinion, some tasks are performed better when people work together as a team. However, others, like writing, are probably best tackled individually.

4. What is the main purpose of the text?

- A. to tell a story of the group work.
- B. to persuade the readers of group work.
- C. to discuss the pros and cons of group work.
- D. to inform the reader of the dangers of group work.

5. In paragraph (3), what does the underlined word “distracted” ?

- A. tired
- B. bored
- C. embarrassed
- D. absent-minded.

6. According to paragraph 2, why does groupwork create a more comfortable classroom environment? Mention two reasons.

Reason 1	students can ask each other questions
Reason 2	Group work encourages students to listen to the opinions of others.

7. According to paragraph 3, what are the disadvantages of groupwork?  
Mention two.

type 1	students may become <u>distracted</u> .
type 2	only certain opinions are heard.

8. Based on paragraph 4, what is the writer’s opinion towards online education? What is the proof the writer gave to defend his point of view?

The writer’s opinion	some tasks are performed better when people work together as a team
Proof	Other activities, like writing, are probably best tackled individually.

## Reading

Read the following text and then answer the questions that follow.

- 1) Have you ever been to the beach? Did you see a man with a headset pointing a long pole at the ground? If so you might have seen a person using a metal detector. People use these devices to find metal.
- 2) Metal detectors make magnetic waves. These waves go through the ground. The waves change when they hit metal. Then the device beeps. This lets the person with the device know that metal is close. The first metal detectors were meant to help miners. They were big. They cost a lot of money. They used a lot of power. And worst of all, they didn't work well. People kept trying to make them better.
- 3) Metal detectors got smaller. Now they are light and cheap. They also work better. That is why people bring them to the beach. They can look for rings in the water. They can look for phones in the sand. Metal detectors help them find these things. They usually just find junk though. Metal detectors also protect people. They help to keep guns out of some places. They are in airports. They are in courthouses. Some schools use them. They help guards look for weapons. Guards use special wands to find metal on a person.
- 4) These devices save lives in other ways too. During wars, people plant bombs in the ground. When the war ends, they don't clean up their messes. This is unsafe for the people who live in those places. Others use metal detectors to find bombs. They remove them and help the people.
- 5) These devices also make clothes safer. It sounds funny, but it's true. Most clothes are made in big factories. There are lots of needles in these places. Needles break from time to time. They get stuck in the clothes. They would poke people trying them on. They don't though. That's because our clothes are scanned for metal. Isn't that nice? Let's hear it for metal detectors. They make the world a safer place.

1. What is the text MAINLY about?

- A. the importance of magnetic waves to find metals
- B. looking for metals on beaches by tourists to sell them
- C. the importance of Metal detectors as a device used for finding metals
- D. the funny clothes which are produced by metal detectors in big factories
