Directions: Read the following then answer questions 10 to 14.

Wembley Stadium

1. After four years of delays caused by severe legal problems and budget difficulties, the new Wembley Stadium reopened a few weeks ago. The 90,000-seat stadium, costing an incredible £800 million, is described by many as 'the world's greatest stadium'. The new Wembley is twice the size and four times as high as the old Wembley. The original

Wembley Stadium was opened in April 1923. As a matter of fact, it was constructed in just 300 days at a cost of only £750,000. The stadium hosted some of the most important moments in English footballing history, including the 1966 World Cup Final between England and West Germany.

2. By the end of the 20th Century, it was clear that the country needed a new national stadium. The old Wembley lacked many of the facilities that modern stadiums provide. The old stadium closed in 2000 and was demolished in 2002. Work started on the new Wembley Stadium in **October 2002**. Twenty-three thousand tons of steel were used in its construction. Over 2,000 people worked on the building site every day, from architects to cleaners.

3. The stadium finally opened in **March 2007**, four years later than planned and hundreds of millions of pounds over budget. The new Wembley has been designed to be the most comfortable stadium in the world. There are now 90,000 seats with lots of space and a perfect view of the game. There are hundreds of restaurants, cafes, and shops, not forgetting the 2,618 toilets!

4. One of the most interesting parts of the new stadium is the hi-tech roof. This can be opened or closed in only 15 minutes. Now, sports fans will never get wet if it rains. Approximately 1.5 million football fans will visit Wembley every year. However, it will also be used for other sports including American football, athletics and rugby. It will also be used for pop concerts.
