Reading Time	Reading /Writing
Phonics + Module test	All skills are integrated

Enrichment lessons:

lessons	Module
Top Time	1
CLIL	2
Top Time	3
CLIL	4
Top Time	5

General Notes

- Each module will be covered within 11 blocks.
- All the support and enrichment lessons will be dedicated to enhancing reading and writing skills aligned with the plan entitled (Literacy Plan). Make sure to utilize them to address all students' needs.
- Make sure to reinforce literacy skills by integrating the writing skill into reading and speaking lessons.
- During **Mid-Term 1** Exams, make sure to continue teaching module 3 to avoid any delay.
- Round-up lessons can be exploited for exam revision.
- It is essential to exploit the "Grammar Reference " to focus on what students need to acquire.
- Make use of the WB for various purposes such as differentiation and formative assessment.
- Project lessons will be taught within 2 blocks.
- Key competencies are woven into the activities, and students should be acquiring and developing them. It must also be understood that aspects of several competencies may overlap. For example, problem-solving may also involve other competencies such as creative and critical thinking, inquiry and research, communication, as well as cooperation, and participation, depending on the type of activity.
- The competencies of **LITERACY AND COMMUNICATION** are integral ones in the curriculum. For this reason, they are not mentioned in the above table.

- Values education has been taken into consideration in the design of the course. Through exposure to concepts and ideas, as well as to specific ways of carrying out activities, students are guided to understand their place in the classroom and in school, in their family and in the wider community, and as citizens of the world. Simultaneously, they become conscious of their corresponding rights and responsibilities.
- The learning outcomes mentioned above are **NOT** the only outcomes of the modules. They are meant to be guidance on determining the end goals of each module. Outcomes should incorporate the appropriate match of competencies, values/cross-cutting issues along with the target skill.
