-

## Reading Comprehension:

### Read the passage and answer the questions.

Thomas Edison lit up the world with his invention of the electric bulb. Without him, the world might still be a dark place. Thomas Edison was born in Milan in 1847. His family moved to Michigan, when he was seven years old. Surprisingly, he attended school for only two months. His mother, a former teacher, taught him a few things, but Thomas was mostly self-educated. His natural curiosity led him to start experimenting at a young age with electrical and mechanical things at home.

When he was 12 years old, he got his first job. He became a newsboy on a train. He set up a laboratory in a baggage car of the train so that he could continue his experiments in his spare time. He got his first patent in 1868 for a vote recorder run by electricity. However, the vote recorder was not a success. In 1870, he sold another invention, a stock-ticker, for \$40,000. A stock-ticker is a machine that automatically prints stock prices on a tape. He was then able to build his first shop in New Jersey.

Thomas Edison died in 1931 in New Jersey. He left numerous inventions that improved the quality of life all over the world.

1. What is the text MAINLY about?

A. a TV inventor

B. a famous doctor

C. a former teacher

D. an electric bulb inventor

## Reading Comprehension:

### Read the passage and answer the questions.

Computers are probably the most important modern invention. They are machines which follow instructions or programs which tell computers how to store and control electronic information. It is very important because it can do difficult sums quicker than we can close our eyes. Computers can store **huge** quantities of information and they never forget it.

Computers are everywhere today. At home, we use them for the internet. In banks, computers are very important because they are used to store information about people's money. Nowadays, most books are made with the help of computers. Factories use computers to control robots which can do work that people did in the past. Doctors use computers to help them to examine their patients.

On the other hand, the first mobile computers were heavy and ran from mains power. Shortly, computers made life easier for people.

1. What is the text **MAINLY** about?

A. banks

B. robots

C. internet
