Reading Comprehension:Directions: Read the passage and answer the questions.

Spiders are very strange creatures. They have got eight legs and 48 knees!

There are two main kinds of spiders; they are running spiders and jumping spiders.

Most spiders can't see very well, but all running and good eyesight. In fact, scientists think that jumping spiders can see better than we can!

Running spiders never stay still for very long. There are lots of different types of running spiders, and they are all very fast. Like all spiders, running spiders make silk. However, they don't use it to **create** webs or catch prey. Running spiders don't need webs. They are very good hunters. They run after their prey and catch it easily, and most of the time, their prey doesn't even see them.

Jumping spiders are very good at jumping. Like running spiders, jumping spiders sleep in little 'tents' which they also make from silk. They like sunny weather, so they hunt during the day. Jumping spiders don't create webs because they jump on their prey to catch it. They plan their jumps very carefully; during the jump, the spider spins a piece of silk starting from the place it jumps from. This is like a 'rope', and it keeps the spider safe from falling and helps it climb back up to its home again.

Reading Comprehension:Directions: Read the passage and answer the questions.

Fahad is one of my best friends. Last summer, he wanted to spend a nice holiday after getting high marks in the exams. First, he went with his family to Al-Khor where they stayed at the new Hilton Hotel. The family enjoyed the weather in Al-Khor because it was fine. Every morning, the boys went swimming while their parents enjoyed sitting on the beach. In the afternoon, they used to have their lunch in the hotel's restaurant. They had delicious meals in that restaurant during their stay. In the evening, they used to go shopping in the malls. They also used to watch a movie in the cinema.

After a few days in Al-Khor, Fahad left his family to start the second part of his holiday plan. He went to Hamad Airport to travel to London. When he arrived in London, he found his friend Jack waiting for him in the airport. Fahd was very **pleased** to see Jack again. During his stay, Fahd saw Big Ben, the famous high tower in London. Big Ben is 96 meters high. Next, they went to the British Museum where they took a lot of fantastic pictures. Fahd stayed for 15 days in London. Reading Comprehension:Directions: Read the passage and answer the questions.

Cheetahs are the fastest land animals on earth. A cheetah has slim long, legs and a skinny body. Its head is small and rounded. A cheetah also has a flexible spine with a very long tail. Its tail is 66 to 84 centimeters long. A long tail helps the cheetah balance when it's making quick turns as it hunts. Cheetahs run short distances for 20- 60 seconds at speed up to 70 miles per hour.

Cheetahs live in Africa and small sections of Iran. Cheetahs are the smallest member of the big cat family usually weighing 34 to 64 kilograms. There is a long black line runs from the inside of each eye down to the mouth. Scientists describe it as a "tear drop" marking and believe it's to protect the cheetah's eyes from the sunlight and helps them see long distances.

Cheetahs don't roar like other big cats. The noises are very different from noises other big cats make. Cheetahs can't climb trees because they have blunt claws.
