## READING

### 1 -Read the passage, then answer the questions below :-

1. Sleeping is very important for the brain. While we are asleep, the brain **repairs** itself. It also stores information that it learned during the day. If we do not get enough sleep , the brain can not do these things. We become tired and we cannot remember things so well. Our body's 'immune system', which is its self-defense system, becomes weaker, so we are more likely to get ill.
2. Most people find sleep difficult because they are not relaxed. They do not exercise enough during the day, and in the evening they are still thinking about their work or studies . In addition , they make phone calls or look at email messages until late at night. They also have too many drinks which **contain** caffeine, such as cola drinks or coffee, and eat dinner before they go to bed.
3. There are other things we can do to help us get a good night's sleep. Firstly, the bed must be comfortable, with a good mattress and pillows. The bedroom should be dark and quiet. We should also have the same routine every evening before we go to bed. For example, we should read a book, have a hot bath, or listen to relaxing music.
4. Finally, we should try to go to bed at the same time every night. In this way, we will start to sleep better and feel more active during the day.
