B:

- A. Thank you
- B. Good for you.
- C. What did you do there?
- D. No, when did you buy it?

Reading

Directions:

Read the passage and answer the questions that follow:-

1 You may have seen pictures of astronauts. They float around in space. They fly in a space shuttle. Have you ever wondered why they float? Your feet stay firmly on the ground. Why don't theirs? When you drop something, why does it fall? The answer to these questions is something called gravity. It affects everything we do.

2 Many years ago, a man named Sir Isaac Newton wondered about gravity, too. He watched and tested the way things move and fall on Earth. He wrote his ideas down. Scientists today use a lot of his ideas. Those ideas are now considered laws of science.

3 Gravity is a force that makes all objects attracted to each other. The bigger the object is, the more it attracts things. Since nothing on Earth is bigger than planet Earth itself, all the things and people on Earth are **attracted** by Earth. Everything is pulled toward the center of the planet. That is why things fall to the ground. It is also why people and things stay on the ground instead of floating around in space. Earth is even large enough to attract our moon. That's why we can see it in our sky!

4 The main difference between living in space, and living on Earth is floating problem! Here on Earth, we have a force called gravity, which pulls us towards Earth, and gives us weight. Gravity gets less and less when you move further from Earth, and if you get far enough away you become weightless and you float.

5 When astronauts need to sleep, they lie themselves down, otherwise they could float around and bump into things. They usually sleep in sleeping bags. Astronauts wear ordinary clothes, like tracksuits and t-shirt inside the spacecraft. They don't often wash or change their clothes. The clothes don't get dirty, and they have to save water.

1. What is the text MAINLY about?

- A. mass
- B. gravity
- C. motion
- D. universe

1. What did Newton write about?

- A. having a normal life in space
- B. the way of teaching mathematics
- C. the way things move and fall on Earth
- D. helping people to know about plants

2. What is the meaning of the underlined word attracted in paragraph (3)?

- A. pulled
- B. skipped
- C. stopped
- D. changed

3. What is the problem with living in space?

_____ floating problem _____

4. What happens when you move further from Earth?

_____ Gravity gets less and less _____

5. What do astronauts usually wear inside the spacecraft?

_____ They wear ordinary clothes, like tracksuits and t-shirt _____

Vocabulary Module 3**Read and choose the correct answer.**
