18 Dec (National Day)					
End of First Semester Holiday 22/12/2024–2/1/2025					

General Notes

- The teaching package components are full and extensive (refer to the introduction in the Teacher's Book for more details). Teachers are requested to make use of the online resources; interactive CD, tests (for assignment & enrichment purposes), etc.
- Not all the exercises in the workbook can be covered in class, so teachers need to be flexible and careful about which exercises should form the focus of classroom study and which ones could be done as homework or quizzes.
- The writing section in the WB should be covered in class.
- Reading lessons to be covered in **one- two** blocks according to their type & complexity.
- Writing lessons to be covered in **two** blocks.
- The "Culture Pages", "poems" and the "Tasks" can be exploited as enrichment material through which teachers can promote students' reading and writing skills.
- It's recommended to have a unit test after each module.
- The speaking and the grammar reference sections are essential parts in the textbook. Thus, teachers are requested to exploit them appropriately. ,
- Values education has been taken into consideration in the design of the course. Through exposure to concepts and ideas, as well as to specific ways of carrying out activities, students are guided to understand their place in the classroom and in school, in their family and in the wider community, and as citizens of the world. Simultaneously, they become conscious of their corresponding rights and responsibilities.

Subject: English

First Semester Overview -Academic Year 2024-2025

Grade (8)

- Key competencies are woven into the activities, and students should be acquiring and developing them. It must also be understood that aspects of several competencies may overlap. For example, problem solving may also involve other competencies such as creative and critical thinking, inquiry and research, communication, as well as cooperation and participation, depending on the type of activity.
- Although the activities students are involved in require them to activate the knowledge, skills and attitudes through which they develop specific competencies, the way teachers deal with the activities in class can help to maximise the benefit for students.
- The learning outcomes mentioned above are NOT the only outcomes of the modules. They are meant to be guidance on determining the end goals of each module. Outcomes should incorporate the appropriate match of competencies, values/cross-cutting issues along with the target skill.
