**Q 21 Comprehension :Read the following passage , then answer the questions in complete sentences**

Fast food is the food sold in many inexpensive restaurants as McDonald’s, Kentucky and Hardee's . It called “Fast” because you get your food very quickly. It might take you only twenty minutes to get in, order your meal, eat it and leave. The kind of food served in those restaurants are beef and cheese burger, hot sausage, fried chickens and French fries which are full of fats and carbohydrates. A fast food meal also includes a soft drink like cola, soda, juice or milk shake.

The problem is that such kind of food is so rich in fats, sugar, salt and cholesterol. Doctors advise us to eat less fast food, more salads because they are good for health, and drink less sugary juice. They say that fast food is a reason for getting fat and it might cause some people to get heart problems.
