5- Read the text and answer the questions with (T) or (F):

Department Store Robbed!

One night, in Germany, three men robbed a department store. Cameras showed three men with masks over their faces robbing the store and getting away. The men stole jewelry that was worth \$6.8 million. The police didn't know who the men were until they found a drop of sweat, which contained DNA. Scientists tested the DNA and, amazingly, they found two matches-identical twins named Hans and Franz. The police knew that one of the twins had robbed the store, but they didn't know which one. They questioned both of them, but each twin said that he did not rob the store. Finally, the police had to let both twins go. They were not able to find out which one was the robber. Now, all the police can do is watch both twins and hope that one of them leads them to the stolen jewelry.

Two brothers robbed a department store.	T	F
2. Three men stole computer equipment that was worth \$6.8 million	Т	F
3. DNA led the police to two identical twins.	T	F
4. The police were not able to find out which twin was the robber.	Т	F
5. The police were able to find the stolen jewelry.	T	F

Writing

6- Write about a strange coi	incidence that happened to you	/ 5
